History

- 1947 ■ The beginning of the Airwell's story, a french air conditioning brand.
- 1950 ■ The firm developed and began the mass production of the first window unit, to offer exceptional climate conditions, mainly dedicated to European and African markets.
- 1970 ■ Airwell developed a split system unit by splitting its core window unit in two parts. It was the first to produce wall split systems in Europe. Implantation of historical plant Tillières-sur-Avre in France.
- 1982 ■ The company designed and produced the first European wall split system range including electronic remote control, a high technology cross-flow fan for low noise levels and rotary compressors.
- 1998 ■ The group acquired production facilities in China (Shenzhen).
- 2013 ■ The firm launched its unique and exclusive call center dedicated also to final customer.
- 2014 ■ Airwell set up presentation and training center in France and worldwide.
- 2015 ■ Airwell launched its new online order service.
- 2017 ■ Airwell celebrates its 70th anniversary.

Regulation and standards

An important part of Airwell's strategy is to anticipate and go further beyond the new European regulations, safety standard and guidelines that will be applied soon.

The requirements are covering all the cycles of the production process from manufacturing to distribution and marketing.

Most of the Energy requirements today are related to the European Commission Plan named "20-20-20" to improve the environmental aspects of Energy related product, which dictate the following:

- Reduce by 20% the emissions of greenhouse gases.
- Increase by 20% the energy efficiency of energy systems in the EU..
- Reach 20% of renewables in total energy consumption in the EU.

Due to its international presence, Airwell Residential must comply with the most drastic regulations and standards related to the product's manufacturing, safety, energy and design.

Airwell products are designed as environmental friendly and safe.

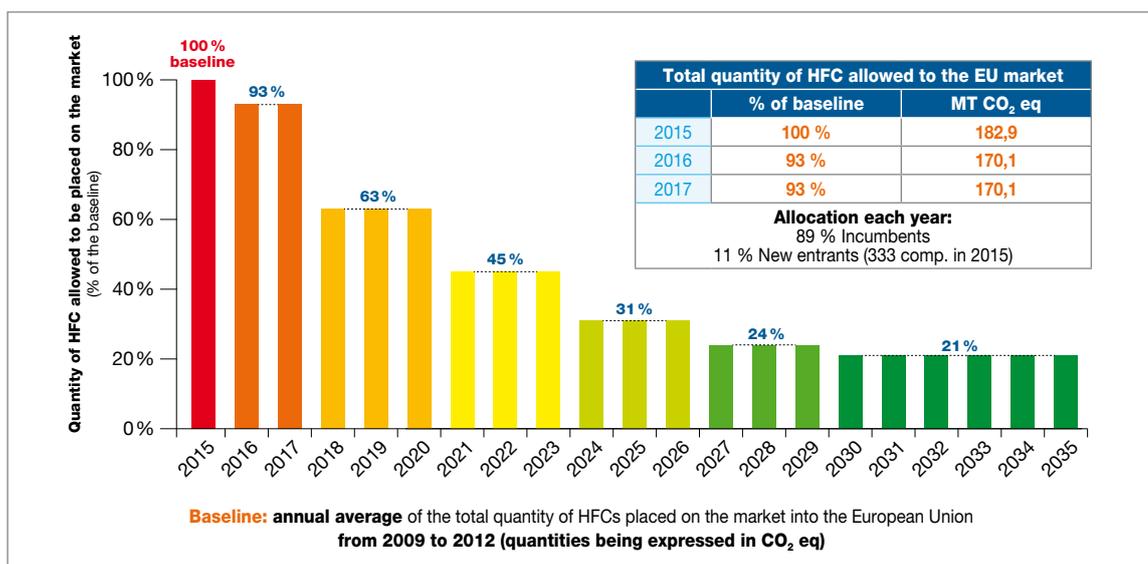

The most important regulations today are:

Since January 2015, the regulation FGAS (EU 517/2014) is implemented.

Refrigerant fluid are man-made gases that can remain in the atmosphere for centuries and contribute to a global greenhouse effect. There are three types: hydrofluorocarbons (HFCs), perfluorocarbons (PFCs) and sulphur hexafluoride (SF6).

The F-Gas regulation's goal initiated by the European commission is to reduce greenhouse gas emissions in the EU by 80-95 % compared to levels in 1990.

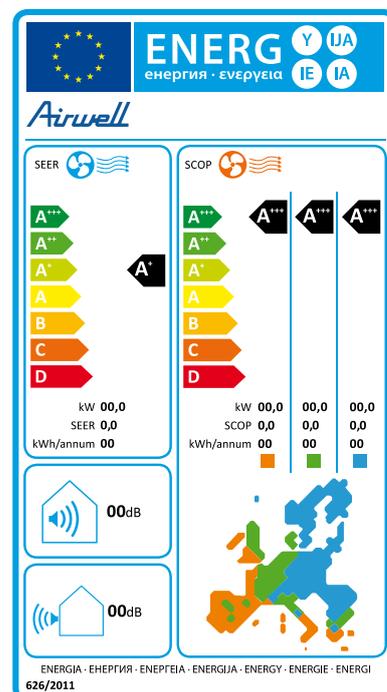

Energy Label design

HOW THE ENERGY LABEL IS IMPLEMENTED?

Rated power (P_{design} H/C) and SEER/SCOP test condition:

- Each model is rated at rated power in cooling and heating:
 - **For cooling:** P_{design}C.
 - **For heating:** P_{design}H.
- Each product must meet the climate requirement levels to which it belongs:
 - **Average:** minimum condition to fulfil.
 - **Warmer:** if the product is designed for warmer conditions.
 - **Colder:** if the product is designed for colder conditions.
- P_{design} affects directly the SEER/SCOP level as there are few tests done in cooling and heating according to the climate category and adjusting the power for each test condition.
- The below table shows the test conditions in cooling and heating, the ratio of the P_{design} in cooling and heating in a different climate category.

Operating conditions for standard rating

	New standard (ECO design)								
	Indoor unit			Outdoor unit					
	Air inlet °C		Test type	Air inlet °C					
	Dry bulb temperature	Wet bulb temperature		Inlet temperature			Part load of Pdesign ratio		
Cooling mode	27	19	A	35			100%		
			B	30			74%		
			C	25			47%		
			D	20			21%		
Heating mode	Indoor unit		Test type	Class category					
	Air inlet °C			Average		Warmer		Colder	
	20	15 max	T _{design}	-10	100%	2	100%	-22	100%
			A	-7	88%	-7	N/A	-7	61%
			B	2	54%	2	100%	2	37%
			C	7	35%	7	64%	7	24%
			D	12	15%	12	29%	12	11%
T _{bivalent}			The design condition of the A/C can provide the optimized power w/o any additional energy like heater						
T _o (Min operating temperature)	-15	119%	-15	N/A	-15	82%			

Factory certifications

Airwell Residential is recognized for its reliability. A residential and light commercial range of products with an excellent quality which offers their clients a very big advantage on the air conditioning market. Present all over the world, Airwell Residential applies quality standards to its different production sites and strives to improve them continuously.

The performances of our Airwell Residential products meet the EN14825 standard (seasonal energy standard).

Airwell Residential production sites are certified ISO 9001 and ISO 14001 as well as by most of the recognized certifications.

CE marking

« CE marking » was introduced pursuant to European technical harmonization legislation. It is mandatory for all products covered by one or more European directives which expressly provide for it and it guarantees free movement throughout the EU for these products.

Airwell conduct controls and tests ensuring that our products comply with essential requirements, particularly those concerning health and safety, as set forth in the relevant directives.

Eurovent

Airwell Residential contributes to the Eurovent certification program.

Eurovent Certification certifies the performance ratings of its range (Splits and Multi Splits with at least two indoor units) according to European and international standards. The common competitive playing field for all manufacturers allows to increase the integrity and accuracy of the industrial performance ratings.

Only products listed on Eurovent website are certified. You can check it on:
www.eurovent-certification.com

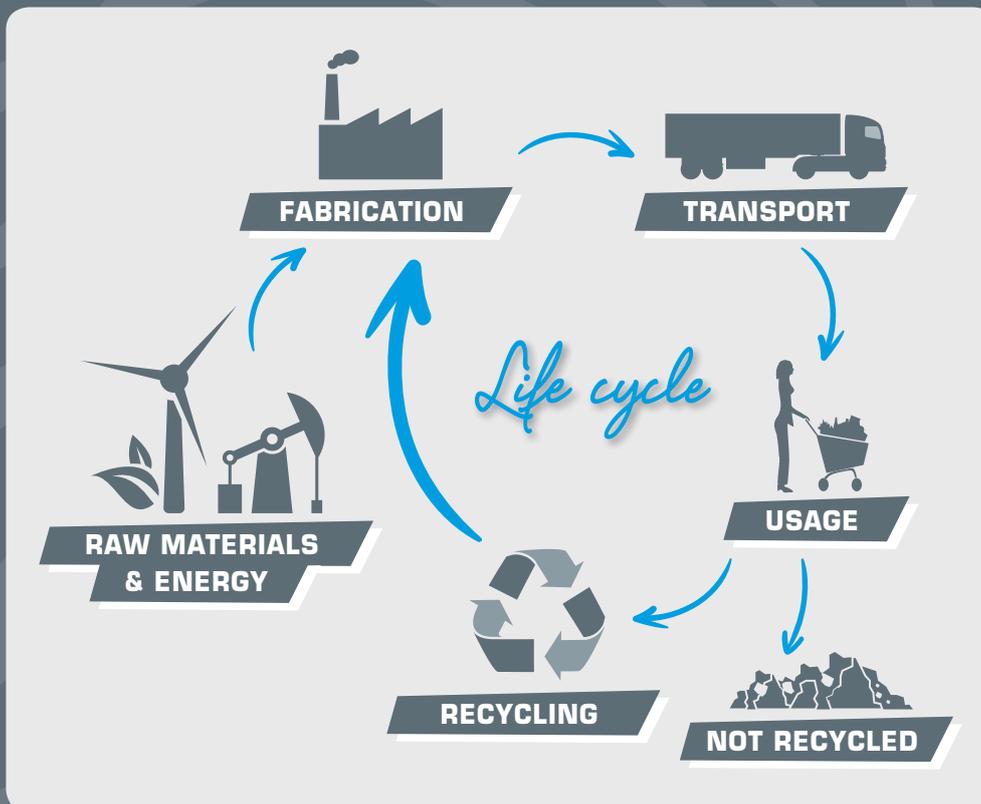

PEP - Ecopassport®

Airwell is part of an eco-environmental approach including a life cycle analysis of our products while building a Product Environmental Profile (PEP).

This life cycle analysis (LCA) allowed to inventory and quantify, all along the products lifecycle, the physical material and energy flow associated to human activities. All the lifecycle phasis have been taken into account: raw materials, manufacturing, transport, distribution, usage, end of life and recycling.

The PEP fits the ISO 14025, 14040 and 14044 expectations. It allows to anticipate the regulatory obligations and forms part of the eco-conception approach which Airwell wants to follow. Finally, building a POP allowed to calculate the environmental performance of some products.

Control your A/C from anywhere at any time

Air conditioners controlled by mobile phone, tablet or computer with wireless router and internet.

- Easy installation.
- Control your A/C by mobile phone/tablet locally or from distance.
- Can control: on-off, operation mode, fan speed, temperature set-up and timer.
- Aesthetic hidden display.
- Android and IOS compatibility.
- HRD/HND/HKD lines: optional.

CONTROL ALL HOME'S AIR CONDITIONERS AIRWELL

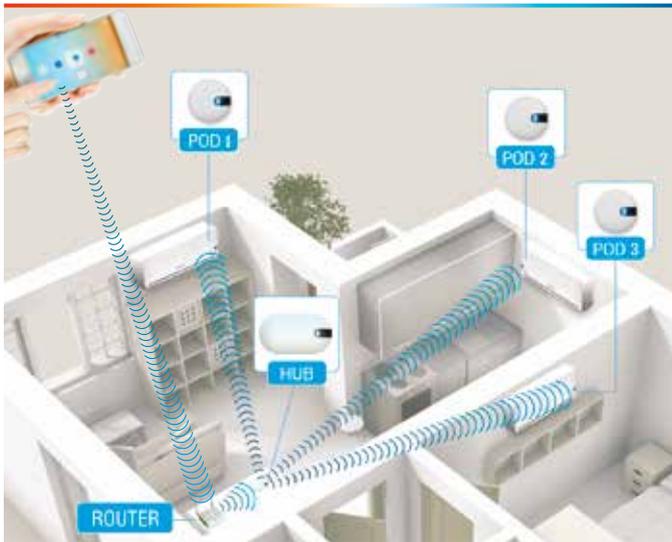

Airwell Sensibo

Airwell Sensibo is a controlling system that manages remote operation of your air conditioning, whatever the brand of your air conditioner, technology (Fixed speed or Inverter) or gas used (R22, R407C, R410A...). The system is easy to install and operate.

- Works on all type of A/C which operates with infrared remote controller.
- Easy installation with no wires to the unit.
- Can be transferred from one A/C to another.
- "Plug & Play" system composed by a hub and up to 10 pods to control your air conditioning.

CONFIGURATION

MAIN FEATURES

- Cools or heats your home before you arrive
- Weekly timer to save energy
- Optimizes temperature and humidity levels
- Saves energy and reduces your electricity bill
- Lets you control the A/C from anywhere

Unique solutions

Super quiet

SUPER QUIET:

- Good-neighbourly relations
- - 4 dB(A)

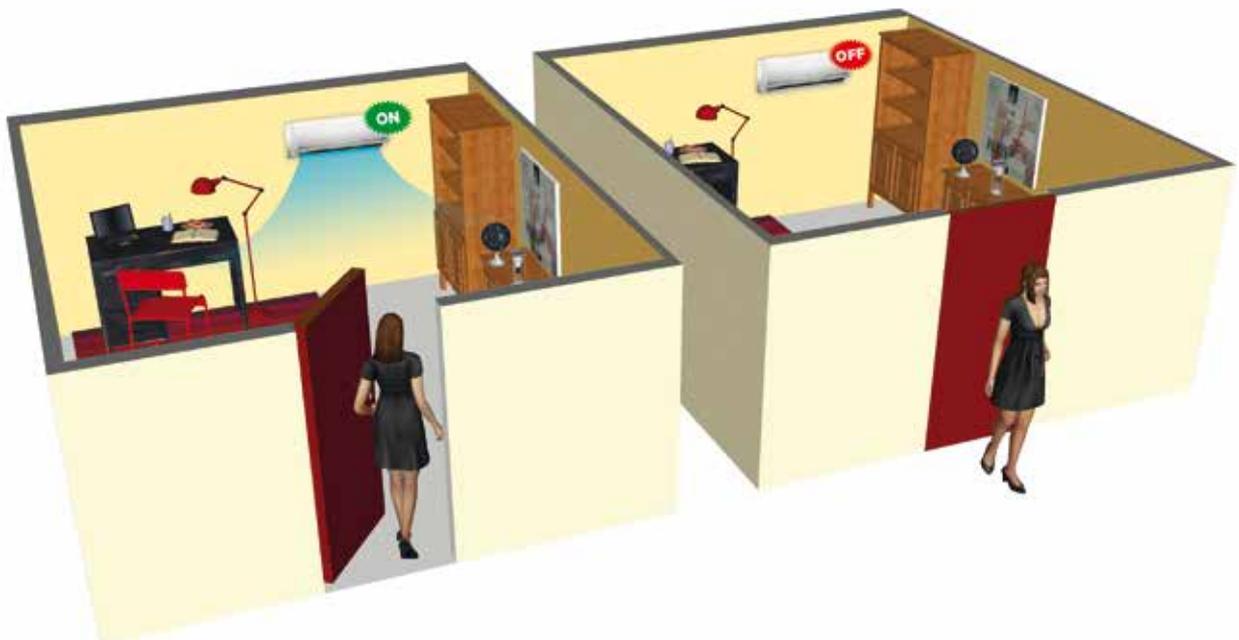

→ Special design for low noise level.

→ Optimized solution suitable for bedrooms.

Presence detector option

→ Efficient solution to save money and optimize regulation is installing presence detector solution via Airwell dry contact.

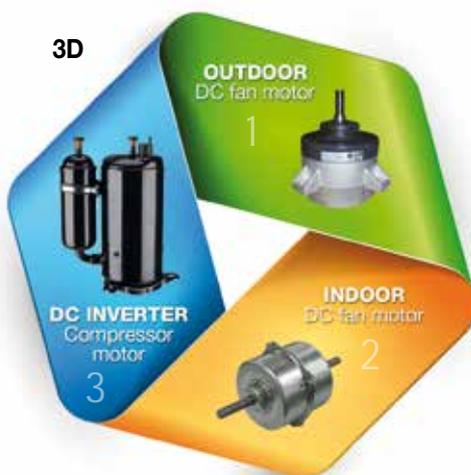

High efficiency

- Reduce your environmental footprint.
- Reduce annual energy consumption in cooling and heating mode and save money!

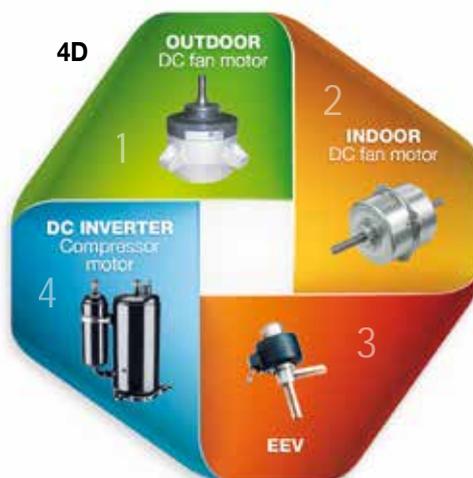

DC Inverter technology 3D-4D

- System design based on DC motors.
- DC motor contributes directly to the system efficiency.
- 4D design based on DC indoor motor, DC outdoor fan motor, DC inverter compressor and Electronic expansion valve.
- In 4D the system can work with optimized parameters in order to achieve maximum performance and comfort.

Technology used for:
HND/HKD

Technology used for:
HRD/XBD/CCD/PCD/DID

New outdoor unit concept

New electronic card concept:

- Upside-down design
- 70% dust reduction
- Higher reliability

New designed mounting:

- Rigid design
- Easy installation and maintenance
- Time saving

New performances:

- Heating capacity until -15°C
- Lower noise level

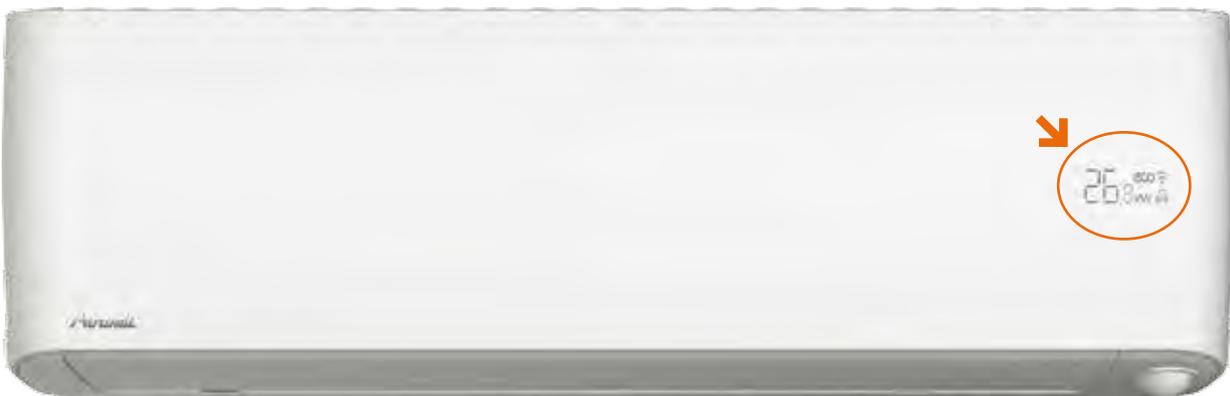

Improvement of communication wire connection

→ Only two connection wires and without polarity, which can hardly avoid mistakes

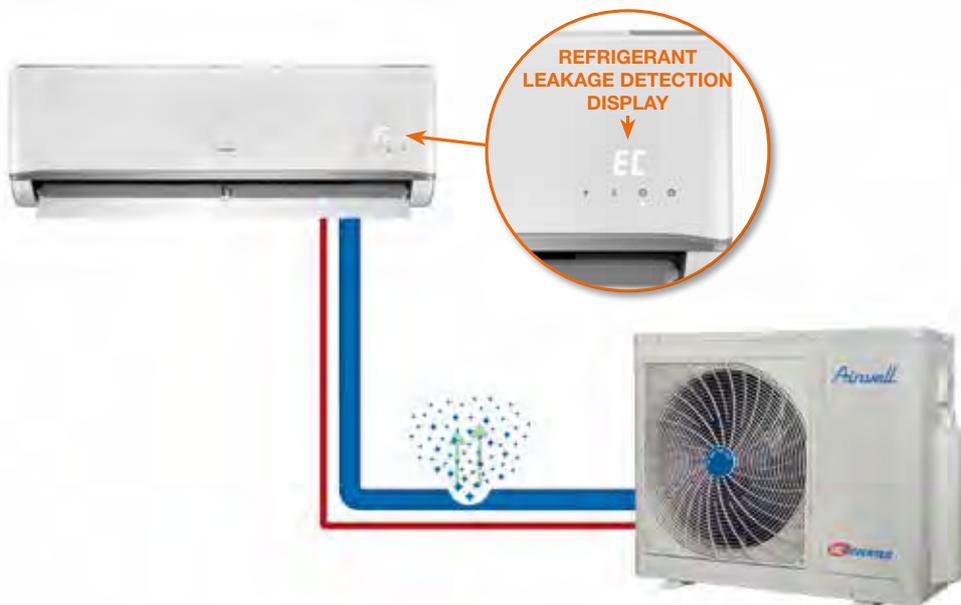

Check running parameters by remote controller

- All below parameters can be showed on display of indoor unit through a remote controller: sensors, compressor, EEV informations, error codes, outdoor and indoor units status.
- Simple and fast for maintenance.

Automatic refrigerant leakage detection

- The electronic controller checks continuously the system parameters and identifies the presence of a refrigerant leakage. In a case of leakage, the system stops, protects the compressor from damage and avoids major service costs.

Refrigerant R32 environmental friendly

HRD

WFD

GWP COMPARISON BETWEEN COMMON FLUID				
Refrigerant fluid	R134a	R407C	R410A	R32
GWP (Global Warming Potential)	1430	1774	2087	675

→ Global Warming Potential (GWP) is a relative measure of how much heat a greenhouse gas traps in the atmosphere.

More details: HRD High wall p. 32 - WFD Window p. 87

DLSE Plus VAV ducted unit

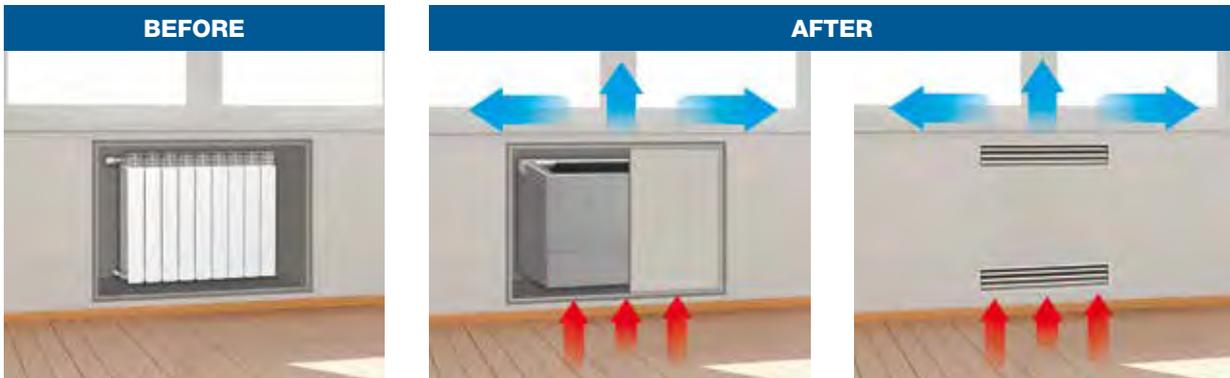

- Intelligent air conditioning: Controls up to 6 rooms
- Cost & energy saving
- DC motor combined with horizontal fan creating high efficiency
- Advanced logic to control the Inverter compressor

More details p. 44

DLF ducted unit

- Vertical and horizontal installation
- Compact: 200 mm height, space saving
- Super quiet
- Hidden solution

More details p. 40

CAO and GCAO: water solution

- Ideal solution for building with aesthetic and local restrictions
- Easy & simple installation

More details p. 92

Unique applications

Services division

The training solution for installers

Training courses

In partnership with its customers, Airwell Residential provides you with Airwell Academy centers for presentations and training, both in France and worldwide. Training courses are regularly offered to present the brand's product range and unique solutions. New centers are due to open throughout the year.

For all training requests, please contact us at the following e-mail address:

■ airwell-academie@airwell-res.com

Training plan

-  Air conditioning
 - Residential air conditioning
 - Light commercial air conditioning
 - Air conditioning systems regulation

-  Heating
 - Residential heating
 - Light commercial heating
 - Heating systems regulation

-  Statutory trainings
 - Solutions for hospitals
 - Solutions for hotels
 - Residential solutions
 - Anti-legionellosis solutions
 - Water treatment

-  Sales training

-  Energy performance
 - Design offices
 - Installers
 - Architects

Read more on our website:

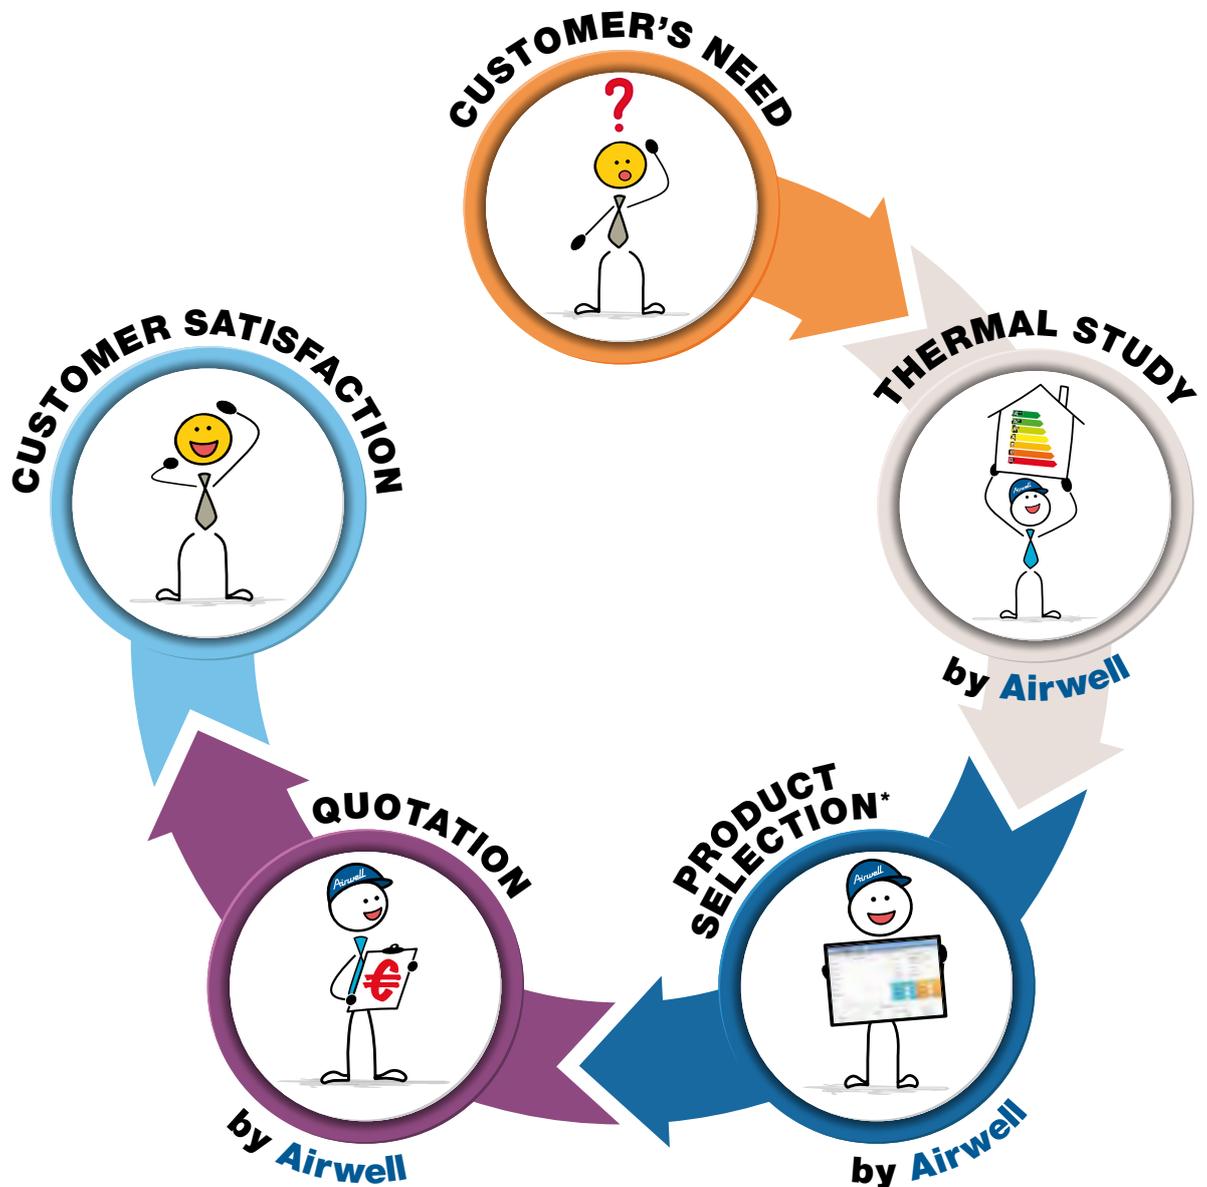

■ www.airwell-residential.com

Pre-sales

Airwell Residential supports you throughout your projects (housing units, hotels, shops, industrial sites, etc.).

Before your plans are implemented, the pre-sales department studies your residential or industrial project to recommend the best technical solution.

Using selection software, the pre-sales selects and designs your air conditioning system.

* and installation dimensioning

Installation/Commissioning

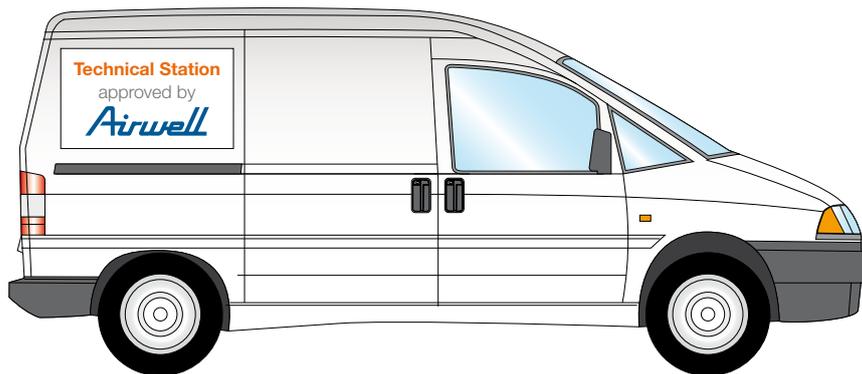

CALL CENTER

- Quick, useful response from our experts
- Generous availability
- Multilingual call center
- Professionals who constantly benefit from training
- A customer-based, service-orientated approach!
- As much attention and help as required for the customer to be fully satisfied

LOCAL AND REMOTE TECHNICAL SERVICE (worldwide)

- Specialized and experienced technicians
- Direct contact by telephone; on-site contact for VIP customers if required
- Full products training
- Supervision of work (field monitoring)
- Commissioning by Airwell Approved Technical Station

SPARE PARTS SERVICE

- Global warehouse in France

Tel. ■ +33 (0)1 76 21 82 95

SPARE PARTS ORDERS:

Online order service

Airwell Residential offers you a new online order service for spare parts and finished goods on the website: **www.airwell-residential.com**

Create your account easily!

- Fill out the request form (download it on our website) and send it to your area sales manager.
- You will receive by mail your login and password to order your products.

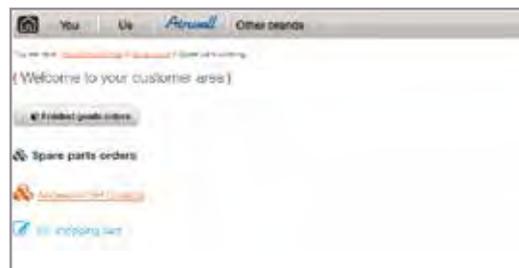

Connect to **www.airwell-residential.com** to the « Order online » service using your personal login.

■ SPARE PARTS ORDER

1. Select the module « Spare part order »

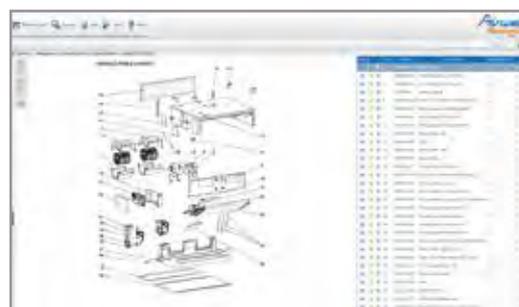

2. Access to spare parts catalogue online

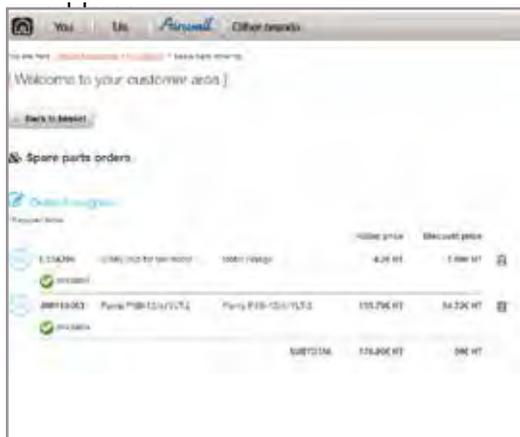

3. You are redirected to the catalogue which allows you to search your device in different ways:

- By serial number
- By goods number
- By description (partial search)

4. Select your spare parts in the exploded view

5. Order summary with your net prices and spare parts availability. Please indicate your part number and a delivery

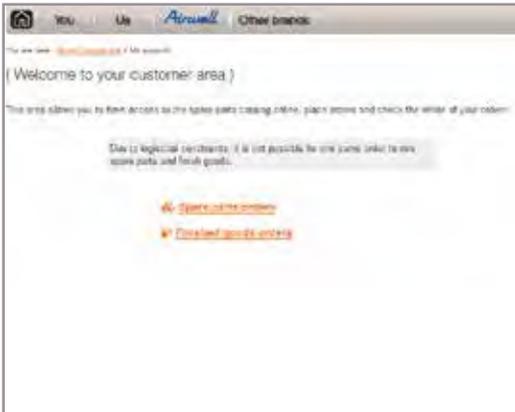

6. Finalize your order. You must click in the link sent by email to confirm your order.

FINISHED GOODS ORDER

1. Select the module « Finished goods order »
2. Indicate in the search engine your part number product (code, product name)

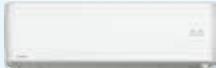

3. Add products to your shopping cart.
4. Order summary with your net prices and products availability. Indicate your part number and a delivery address.

5. Finalize your order. You must click in the link sent by email to confirm your order.

+ PRODUCTS

- Competitive and multi matching solution.
- Operating down to -15°C in cooling and heating mode.
- **WiFi option.**
- Auto restart.

FEATURES

- “I Feel” function with precise room temperature control.
- Left/right drain connection.
- Multifan speed in indoor unit.
- Self clean/dry.

Refrigerant leakage detection alarm system

OPTIONS

Accessory	Part number	Photo	Function
Wired single control RCW8	7ACEL1706		Mode, fan speed, timer ON/OFF, temperature, swing and “I Feel”.
Test tool for high wall	7ACEL1710		Easy viewing of system parameters, failure records and parameter adjustments.
ON-OFF dry contact adaptor	7ACEL1190		Remote control based on last memorized operation. Easy to connect with a weekly timer and window contact.
Air Net WiFi Module	7ACEL1719		Control air conditioners with your mobile phone, tablet or computer with wireless router and internet.

Unique solutions

D L F

Unique and advanced design for vertical or horizontal installation

VERTICAL INSTALLATION

- Vertical installation with compact dimensions, only 200 mm depth.
- The best solution for replacing radiator.
- The best solution in rooms with no space for ceiling installation.
- Creates a clean and modern design after installation.

【 BEFORE 】

【 AFTER 】

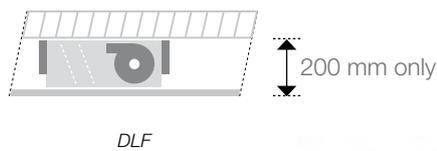

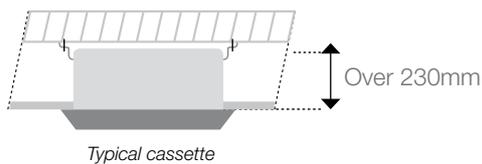

【 COMBINATION MODERN CONSTRUCTION 】

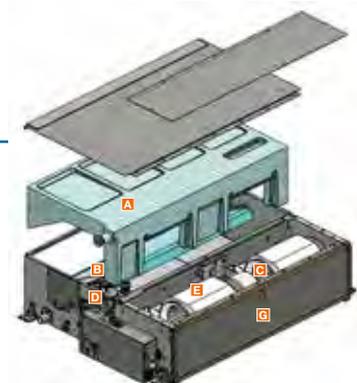

HORIZONTAL INSTALLATION

- Space saving by minimizing the requirement of ceiling height.
- Ideal solution for hotel and bedroom due to super quiet and extremely compact design.

COMPREHENSIVE STRUCTURE DESIGN

- | | |
|-----------------------------------|---------------------|
| A Drain pan | E Fan |
| B Coil | F Controller |
| C DC motor | G Air filter |
| D Water pump + water level | |

- "I Feel" function with precise room temperature control.
- Super quiet line thanks to advance aerodynamic fans and DC motor.
- Heating mode only force option.
- Treatment of corrosion on outdoor units and electronic cards.
- Possibility to reverse dry contact: normally open/normally closed.

Unique solutions

+ PRODUCTS

- Horizontal or vertical installation.
- Extra slim.
- Water pump included.

DLSE Plus VAV

Variable Air Volume

Zone control: Ideal temperature in each room

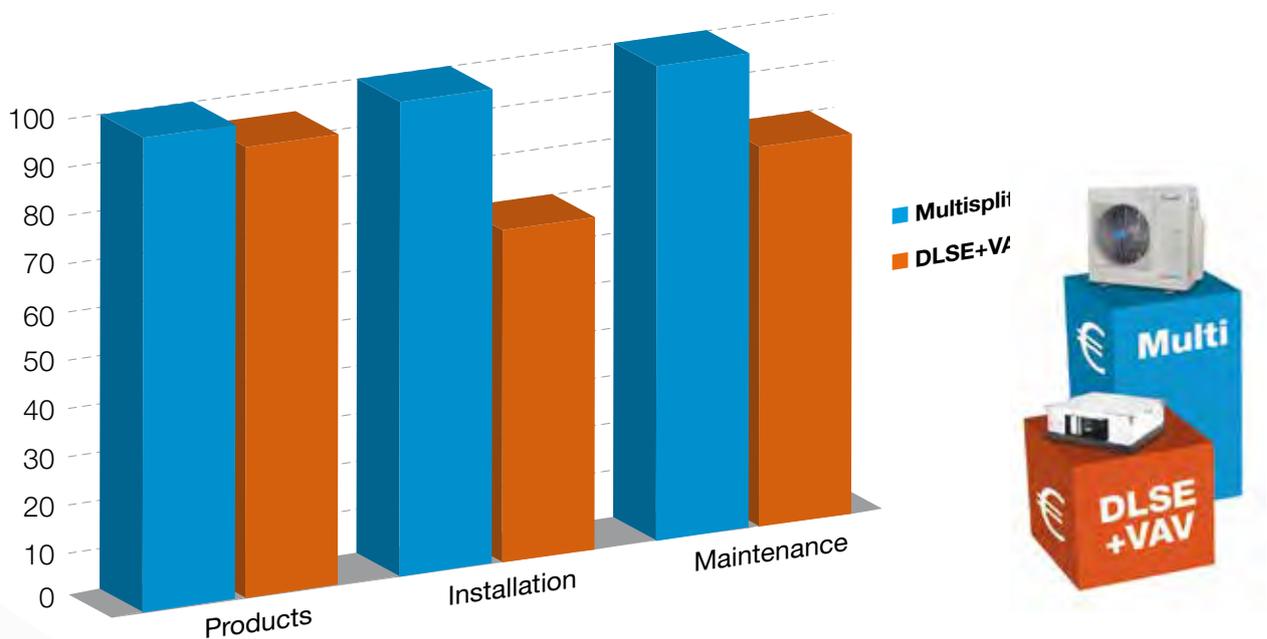

ZONE CONTROL FUNCTION

- Smart air conditioning: Controls up to 6 rooms.
- Each zone has a standalone remote control, to control temperature, "I Feel" and ON/OFF.
- Option to define automatic damper movement or manually to keep max. opening position.
- By-pass damper operates according to system load, which ensures air circulation in the indoor unit.
- Auto-mode: automatically recognizes cooling or heating mode.
- Motorized damper with DC step motor for accurate damper position.
- The blowing dampers change their position (open/close), in accordance with the temperature setpoint in each room, which keeps required temperature.

ENERGY AND COST SAVING

- Two levels of energy saving:
 - by the inverter system following the area load,
 - stops the system when all rooms have reached the chosen temperature and reduces the motor speed.

COST COMPARISON BETWEEN 2 SYSTEMS ON A "STANDARD" HOUSE.

EASY INSTALLATION

- Simple wiring connection by connectors and set up.
- Up to 70m between indoor and outdoor units.
- Monosplit indoor unit: time saving (little tubing).
- Option for installing the control box besides the unit.
- Water pump and overflow switch built in.

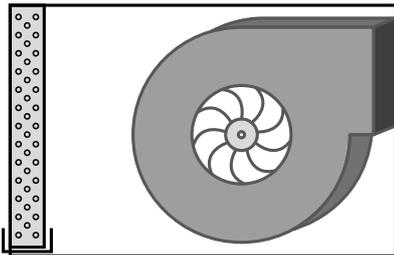

Good to know!

Use our design document to select easily your system.
Ask us this helpful file: mkg@airwell-res.com

SPECIAL DESIGN FOR YOUR CONVENIENCE

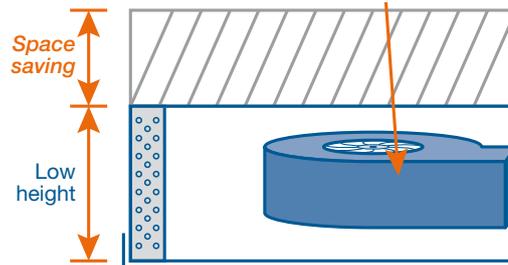

- Unique V shape coil.
- Extra slim indoor unit (low height: 256 mm only).

STANDARD DESIGN

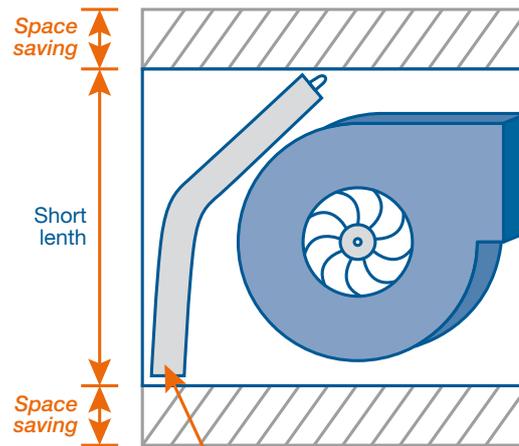

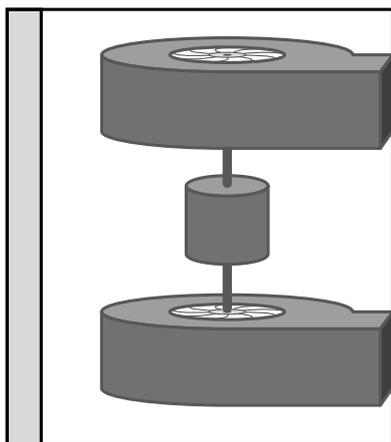

DLSE

Horizontal fan, higher air volume + high static pressure

full profile limits risks of condensation

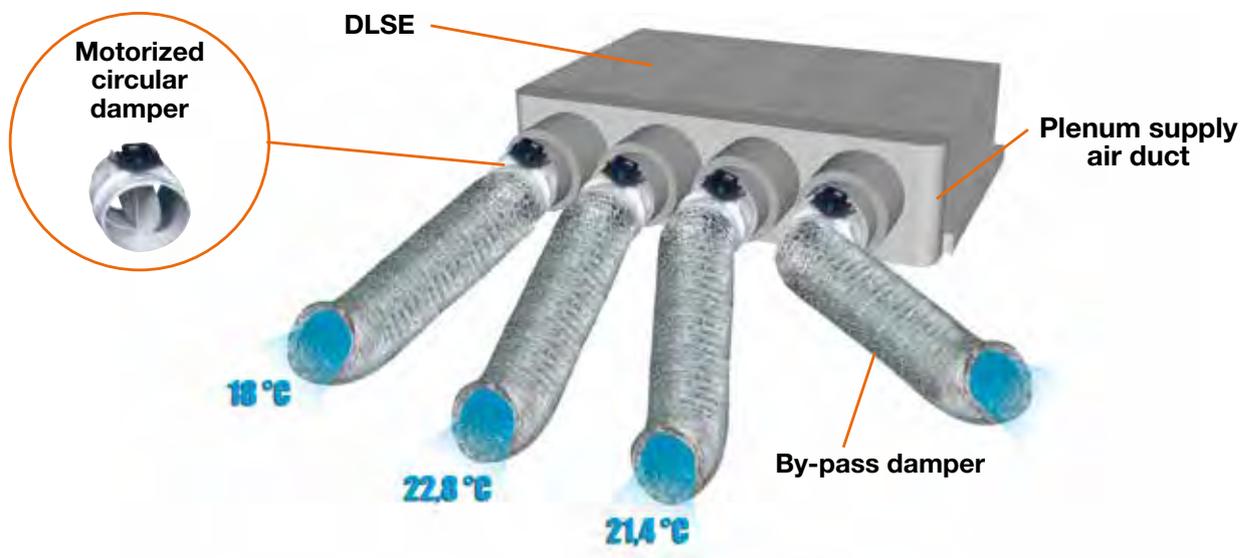

V shape coil for better performance and compact design

How to order?

- For each installation select first the damper type, round or rectangular.
- The main controller is identical except the set up which is done during the installation.
- After that, select motorized round damper, by-pass damper and plenum (see table below).

ROUND APPLICATION

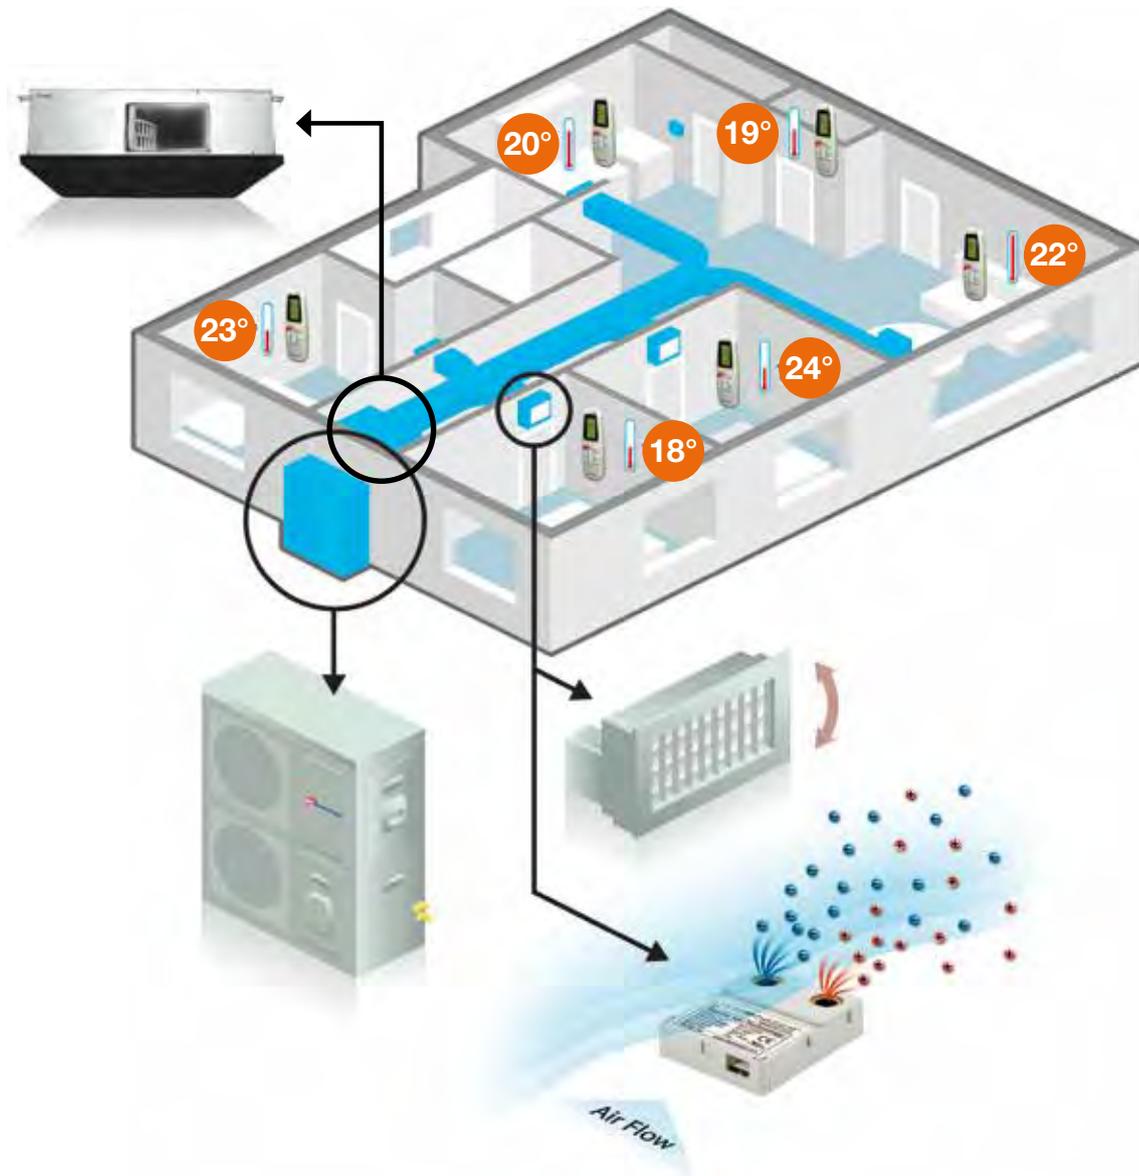

MOTORIZED ROUND TYPE ACCESSORIES

Part description	Product code
Main controller VAV kit	7ACEL1641
Motorized round damper (D=150 mm) kit (Wireless controller C85-R included)	7ACEL1648
Motorized round damper (D=200 mm) kit (Wireless controller C85-R included)	7ACEL1649
Motorized round damper (D=250 mm) kit (Wireless controller C85-R included)	7ACEL1650
Motorized by-pass round damper (D=200 mm) kit (Wireless controller C85-R included)	7ACEL1651
Motorized by-pass round damper (D=250 mm) kit (Wireless controller C85-R included)	7ACEL1652

PLENUM ACCESSORIES: ROUND APPLICATION

Part description	Models	Product code
Air duct plenum - 4 ducts + 1 by-pass	DLSE 18/24	7ACVF0130

Twin application

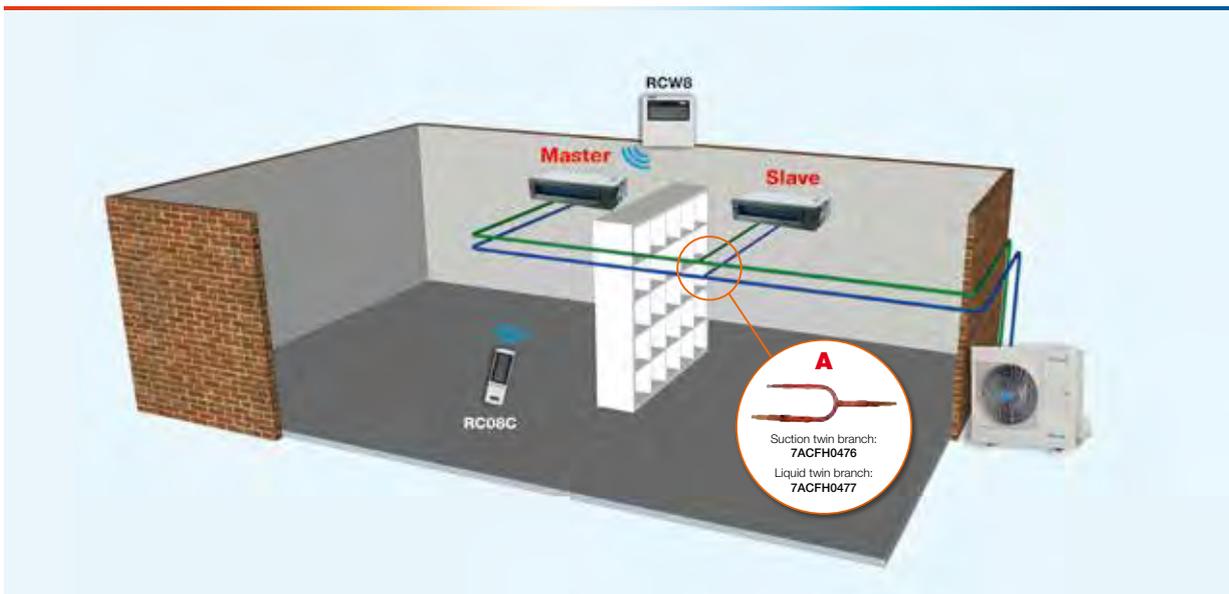

TWIN APPLICATION

The twin application is used mainly in big open space where the total space area is controlled by one controller only for 2 units. Airwell twin design allows to connect two similar indoor units to one common outdoor unit. The two indoor units are working in a same mode and set up only once, one indoor unit used as master.

The most cost saving solution for single-area spaces:

- Simple installation by having one refrigerant and control system.
- Space saving by using one outdoor unit instead of two.
- Low cost installation.
- Simple control, one control station for big space.
- Option to control by wireless or wired controller.
- Ducted or cassette application.

+ PRODUCTS

- Minimum ambient temperature **12°C** inside. Operation down to **-10°C** outdoor.
- Application for wine cellar, garbage room, preparation rooms...

RCW6

FEATURES

- Cooling & heating operation mode.
- DC Inverter and sine wave compressor drive technology.
- “I Feel” function with precise room temperature control.
- Fuzzy logic to control compressor by outdoor fan and electronic expansion valve in extreme low operation temperature.
- Possibility to reverse dry contact: normally open/normally closed.

DEDICATED DESIGN FOR WINE CELLARS OR ANY LOW TEMPERATURE PROCESS ROOMS

Unique
solutions

Twin application

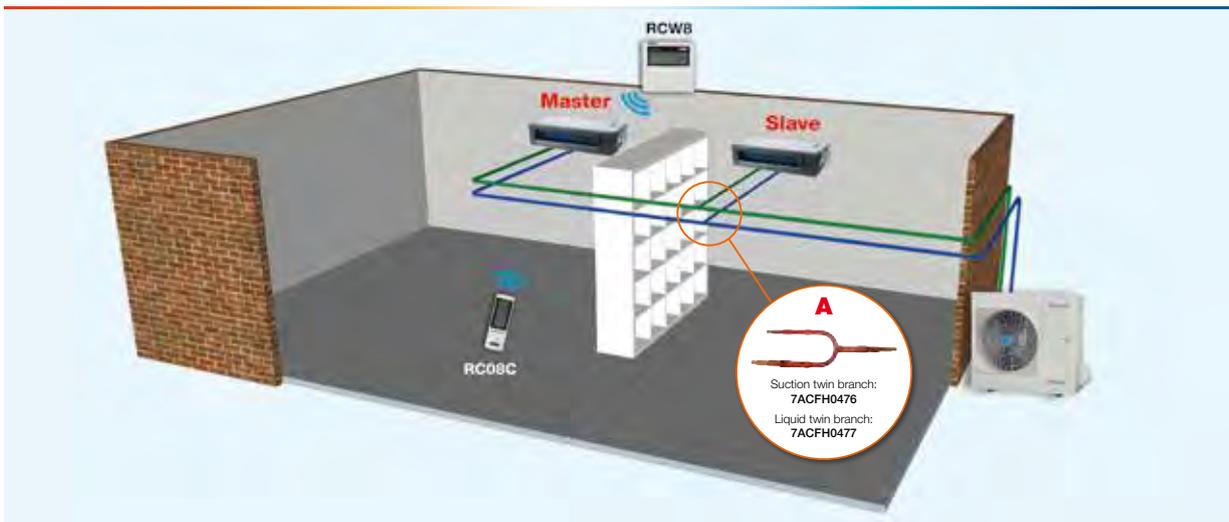

Twin application

The twin application is used mainly in big open space where the total space area is controlled by one controller only for 2 units. Airwell twin design allows to connect two similar indoor units to one common outdoor unit. The two indoor units are working in a same mode and set up only once, one indoor unit used as master.

The most cost saving solution for single-area spaces:

- Simple installation by having one refrigerant and control system.
- Space saving by using one outdoor unit instead of two.
- Low cost installation.
- Simple control, one control station for big space.
- Option to control by wireless or wired controller.
- Ducted or cassette application.

	Indoor units	Outdoor units
Twin system	CCD018 + CCD018	YMD036
	DID018 + DID018

- DC Inverter and sine wave compressor drive technology.
- Match with high wall, ducted, cassette and console indoor units.
- Same indoor for multi and single application (except for CCD009X, CBD018X, XBD009X and XAD018X).
- Option to connect limited indoor units (total capacity >100% of rated capacity) and extend after installation.
- Design for long tubing distance installation.
- 2 digit display to check running parameters.

	ODU lower than IDU	m	15	15	15	
Max. height between indoor units	m	10	10	10	10	

* A++ for HND 9 x 2/HND 9 x 3/HND 9 x 4/HKD 9 x 3 combinations.

Nota: Pipe adaptor (3/8" → 1/2") needs to be fixed on the gas valve of outdoor unit when connecting 18K indoor unit. This adaptor can be supplied by Airwell (ref. 1511160000297).

Pipe adaptor 3/8" → 5/8" needs to be fixed on the gas valve and a pipe adaptor 1/4" → 3/8" on the liquid valve of outdoor unit when connecting 24K indoor unit.

ON/OFF PORTABLE

+ PRODUCTS

- Wireless remote control provided.
- Economic.
- Installation kit for window and wall.
- Self-evaporative system.
- No fluid handling.

RC08C

FEATURES

R410A FLUID

ANTIBACTERIA FILTER

AUTO CLEAN/DRY

I FEEL

SLEEP MODE

TURBO MODE

SELF DIAGNOSTIC

LOW BATTERY INDICATION

AUTO RESTART (MEMORY)

REMOTE CONTROL LOCK

ADVANCED DEFROST

- 0.5 W in standby mode.
- Manual control integrated.

- ECO DC Inverter Window.
- New refrigerant R32 environmental friendly.
- Unique design that can reach the ECO design requirements and 1W in standby.
- High efficiency that can reach SEER over 5.0.
- Bi-operation methods, on unit or by remote control.

+ PRODUCTS

- Monobloc.
- Unique solution.
- DC inverter.
- R32 fluid.
- No fluid handling.

CAO/GCAO: water condensing solution

Easy and simple installation

MONOBLOC SOLUTION

SPLIT SOLUTION

Features

- Ideal solution for building with local or aesthetic restrictions.
- Easy and simple installation.
- Solution for rooms without access to external wall.
- High efficiency system with advanced heat exchanger.
- Built in system protection in water side.

Monobloc solution

Unique solutions

- Electrical heater in option.
- Ideal indoor solution when the building structure or aesthetic reasons forbid a condensing outdoor unit.
- Pressure valve supplied.

+ PRODUCTS

- No outdoor unit.
- No fluid handling.
- Can be connected to public water network.
- French product.

+ PRODUCTS

- Easy installation and maintenance.
- “Plug & Play” for replacement.
- Air discharge through duct network or plenum.
- Adjustable available static pressure.

FEATURES

MAIN OPTIONS

- Room thermostat.
- Hot water heating coil.
- “All season” system (cooling mode operation down to outdoor temperature of -10°C).
- Remote fault reporting.
- Plenum, fresh air.
- Pipe link (10 m).

MANDATORY ACCESSORIES

- Set of female valves.

X AC range is electromechanical
→ High reliability

- Split system with outdoor condenser fan unit.
- Temperature control by thermostat on the front frame or by a remote control (optional).
- Electrical, refrigeration and thermal protection devices.
- Available with or without neutral in 3P/400V/50Hz.
- “High ventilation” in standard for XAC 1200 and 1900.
- “Plug & Play” to replace old Airwell vertical cabinet.
- High ventilation kit and electrical heater factory mounted or in accessory on demand.

OPERATING LIMIT FOR STANDARD UNIT

Indoor unit	
Minimum air temperature (room/intake/around unit)	21°C DB/15°C WB
Maximum air temperature (room/intake/around unit)	32°C DB/23°C WB

+ PRODUCTS

- Weather resistant casing with external panels and drain pan coated with powder-based epoxy paint color RAL 7040.
- Base rail with forklift slots to facilitate transportation and handling.

RCW2
(optional)

FEATURES

R410A FLUID

MAIN OPTIONS

- Electric heater.

MANDATORY ACCESSORIES

- Synthetic air filter.
- Programmable controller RCW2 to Controls up to 15 units with independent set points and programming.

- Technical compartment independent from airstreams allowing maintenance tasks to be performed without disturbing the unit operation.
- High efficiency Scroll compressor with crankcase heater.
- Condenser coils with hydrophilic coated fins to improve removal of water droplets during defrost cycles.
- Standard microprocessor-based control by CAC controller.
- All seasons kit integrated.

OPERATING LIMIT

MORE OPTIONAL OUTDOOR CAPACITY

The basic outdoor unit can be combined being modular in standard. The combined outdoors will get the capacity at the interval of 72 HP. Airwell VRF system has the advantage to be able to operate with only one indoor unit (minimum capacity connected must be 50%).

* Indoor total capacity can be 50% - 130% of outdoor capacity.

Why choosing a VRF system?

■ One system for multiple applications

Shopping centers

Villas

Hostels

Offices

■ Extrem versatility

- All seasons
- Instantaneous mode change (heat/cool)
- Extendable system
- Any indoor unit

AHU CONNECTION KIT

■ Easy installation

- Professional selection software
- Easy setup (plumbing, electricity, regulation...)
- Ideal solution for refurbishment (easy installation also in inhabited places)

Why choosing an Airwell VRF?

- Wide range of power: from 5 to 72 HP (from 15 to 240 kW)
- Silent system
- Compact solution: small footprint
- High performance: COP until 4.5
- Certified Eurovent

(certification in progress)

Performant system

USE HIGH EFFICIENCY DC INVERTER SCROLL COMPRESSOR, HIGH EFFICACITY, LOW NOISE

The highly efficient Scroll compressor is equipped with a “Framen Compliance Mechanism” that allows movement in the axial direction of the frame supporting the cradle Scroll. This greatly reduces both leakage and friction loss, ensuring very high efficiency throughout the speed range.

HIGH EFFICIENCY DC FAN MOTOR

The speed of wide range DC fan motor can be adjusted from 0 to 1000 tr/min.

Compared to conventional AC motors, a DC fan motor offers greater operating efficiency, especially during low speed rotation. The efficiency could be 90%.

HEAT EXCHANGER ADOPTS THE SUBCOOLING TECHNOLOGY: HIGH EFFICIENCY

- The system is cooled with little refrigerant.
- Improve subcooling degree of refrigerant.
- Avoid energy loss due to refrigerant flash evaporating when it goes through PMV.
- W-model Ø8 innergrooved tube.
- Hydrophilic aluminium coil fin, it will increase efficiency of heat exchange by 5%.

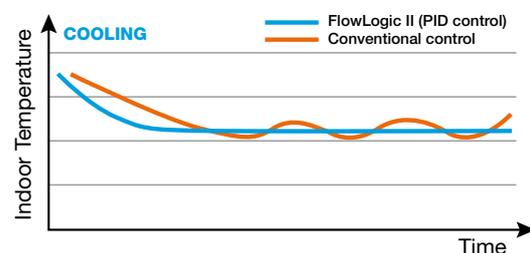

Increase the efficiency of system

- **Increase cooling power by 6%.**
- **Reduce refrigerant circulation amounts.**

PRECISE CONTROL

PID control adjusts the output of compressor and the open degree of EEV, balances the indoor refrigerant flow, realizes the linear output, creates a comfortable environment. The temperature can be controlled precisely.

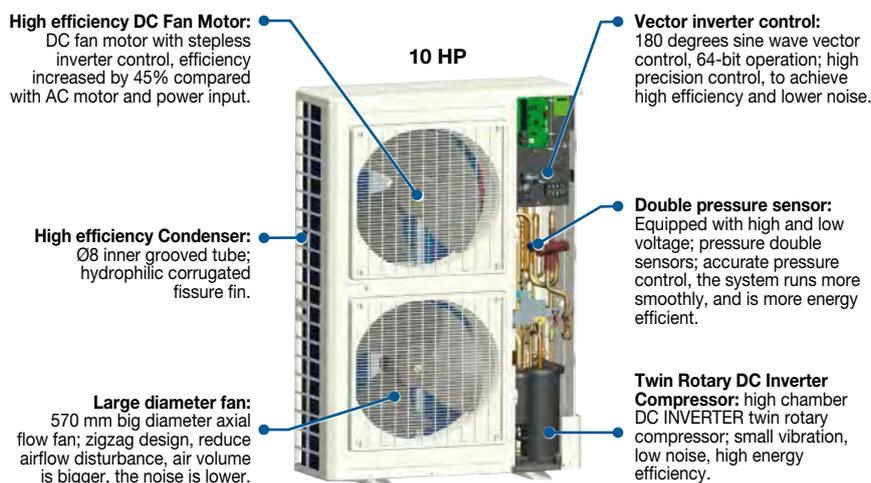

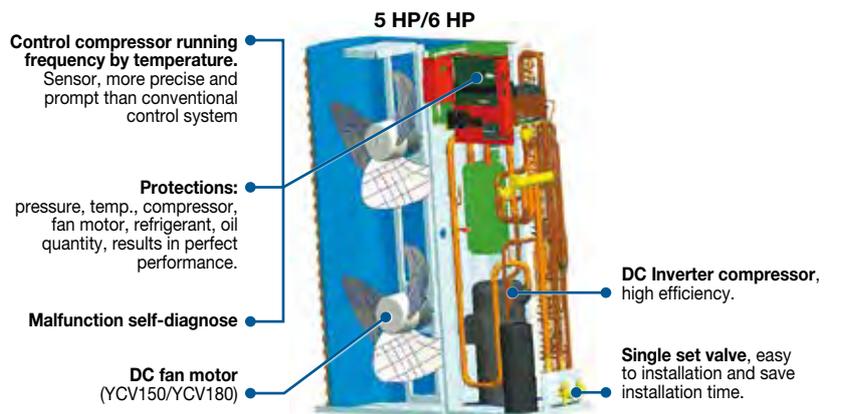

+ PRODUCTS

- COP can reach 4.2.
- Compact (0.32 m² footprint).
- Easy maintenance.

FEATURES

- Capacity range: 5 HP, 6 HP and 10 HP.
- Designed for residential use or for light commercial use.
- Minimum outdoor temperature for heating mode operation -15°C.
- Minimum outdoor temperature for cooling mode operation -5°C.
- DC Inverter compressor and ventilator.
- Refrigerant simple pipe length up to 300 m.
- Capacity ratio 50-130%.

+ PRODUCTS

- COP can reach 4.45.
- Compact (0.97 m² footprint).
- Large capacity range (single and combination).
- DC Inverter compressor and ventilator.

FEATURES

R410A FLUID

DC INVERTER

HEATING MODE
OPERATIONAL DOWN
TO -23°C OUTDOORS

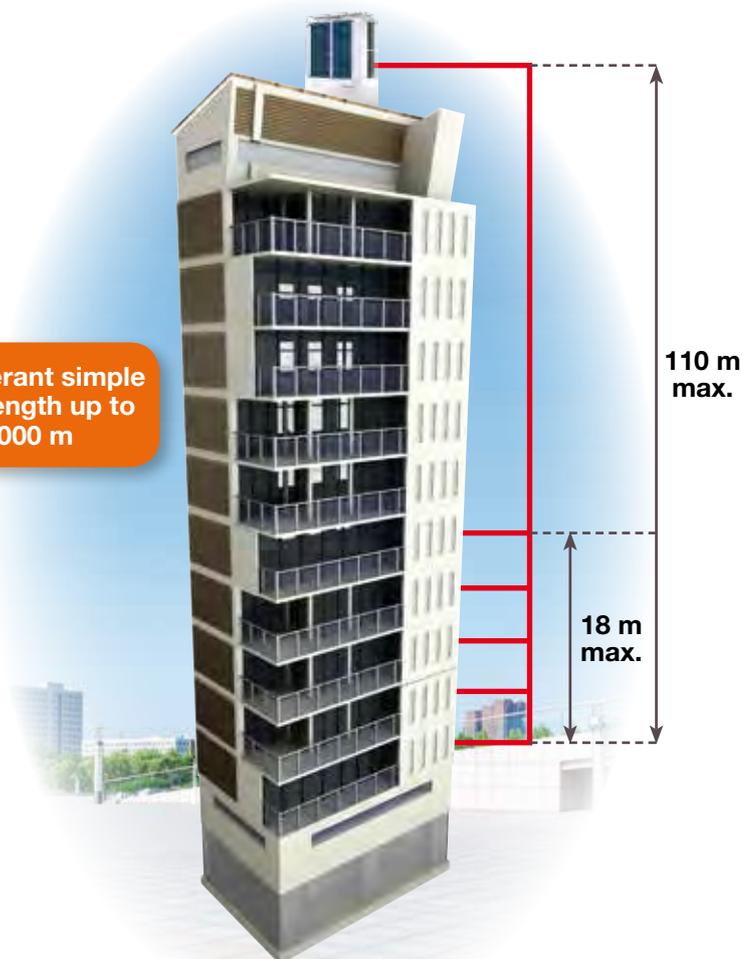

- Capacity range from 10 HP to 72 HP.
- Designed for all commercial uses.
- Minimum outdoor temperature for heating mode operation -23°C.
- Minimum outdoor temperature for cooling mode operation -5°C.
- Refrigerant simple pipe length up to 1000 m.
- Capacity ratio 50-130%.
- Eurovent.

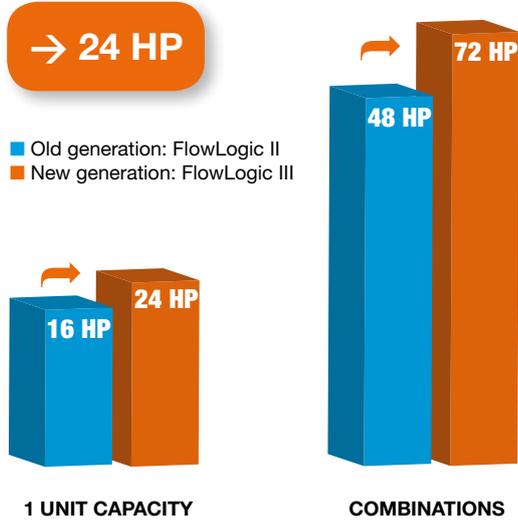

HIGH MODULARITY: LONG PIPE LENGTH, HIGH HEIGHT DROP

Refrigerant simple
pipe length up to
1000 m

■ Single capacity and combination

■ Floor area optimized for all the product range (same foot print for all modules: 0.97 m²)

One of the smallest footprint on market.

→ 0.97 m²

■ Full DC inverter

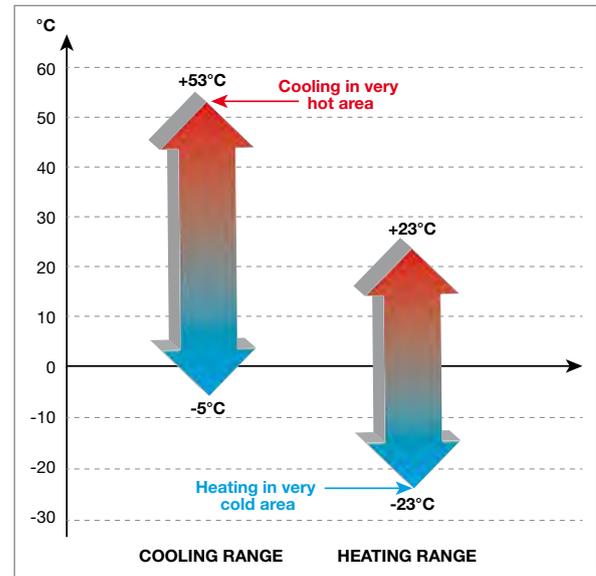

OLD GENERATION: FLOWLOGIC II	NEW GENERATION: FLOWLOGIC III
<p>DCI + Fixed speed</p>	<p>DCI + DCI</p>
<p>→ 1 x DC Inverter compressor → 1 x Fixed Speed compressor</p>	<p>→ 2 x Full DC Inverter</p>

■ High static pressure outdoor unit:
82 Pa, long air duct

Hidden solution:
Installation of
outdoor unit in a
technical room

■ Wide operation range

■ New design/Full new outlook

→ **Specific design:**

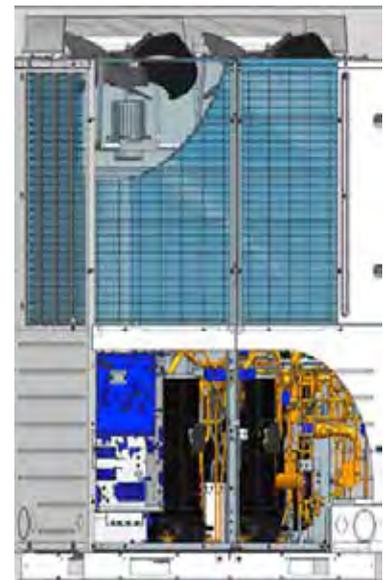

- Double EEV
- Two-piece condenser
- Independent electrical box

→ **Reliability/Maintenance:**

- Compressor double protection: Two pressure sensors
- Double oil temperature sensor
- Large volume gas-liquid separator (26L) + liquid storage tank (10L)
- Two floor structure (no air bypass during maintenance): efficient measures

→ **Fan:**

- Optimized fan to reduce air vibration
- DC fan to optimize efficiency
- 82 Pa static pressure

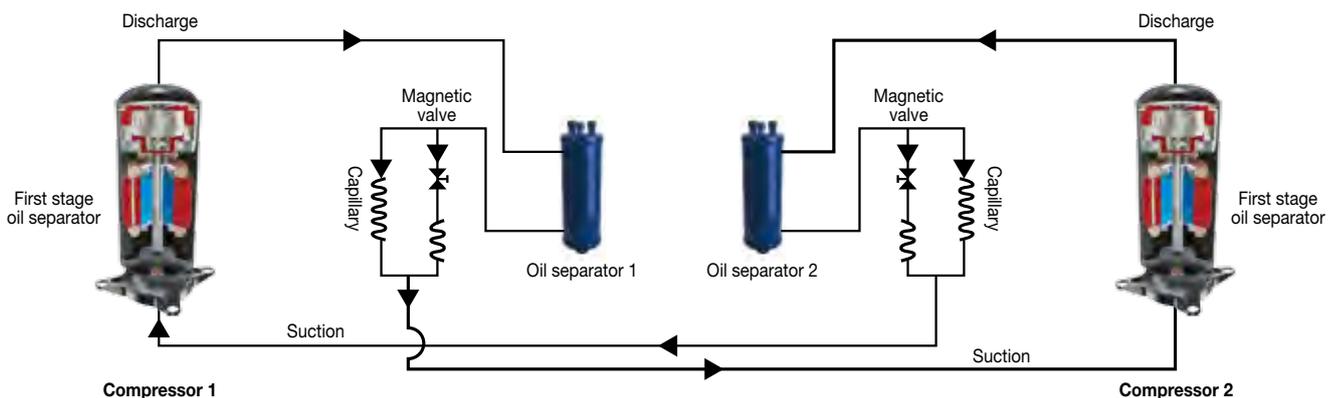

■ Specific oil return

→ Magnetic valve

→ If the compressor operate at low frequency, oil return is only with capillary.

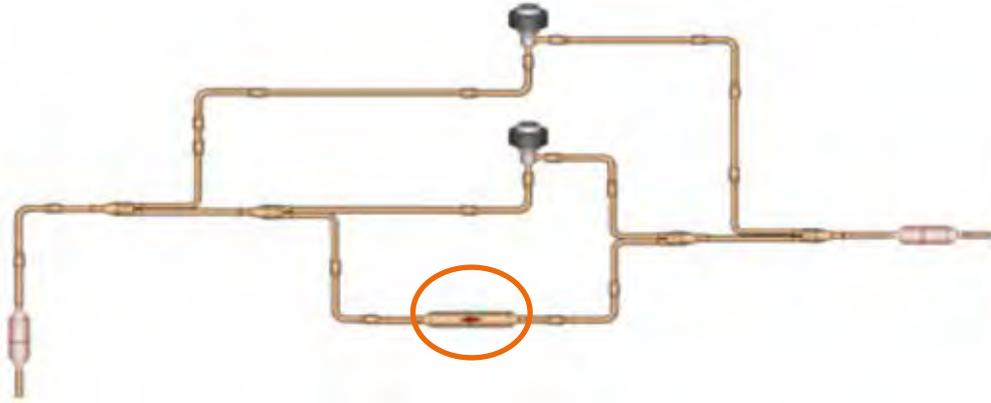

→ If the compressor operate at higher frequency, PCB control magnetic valve to improve oil return.

■ Reliability

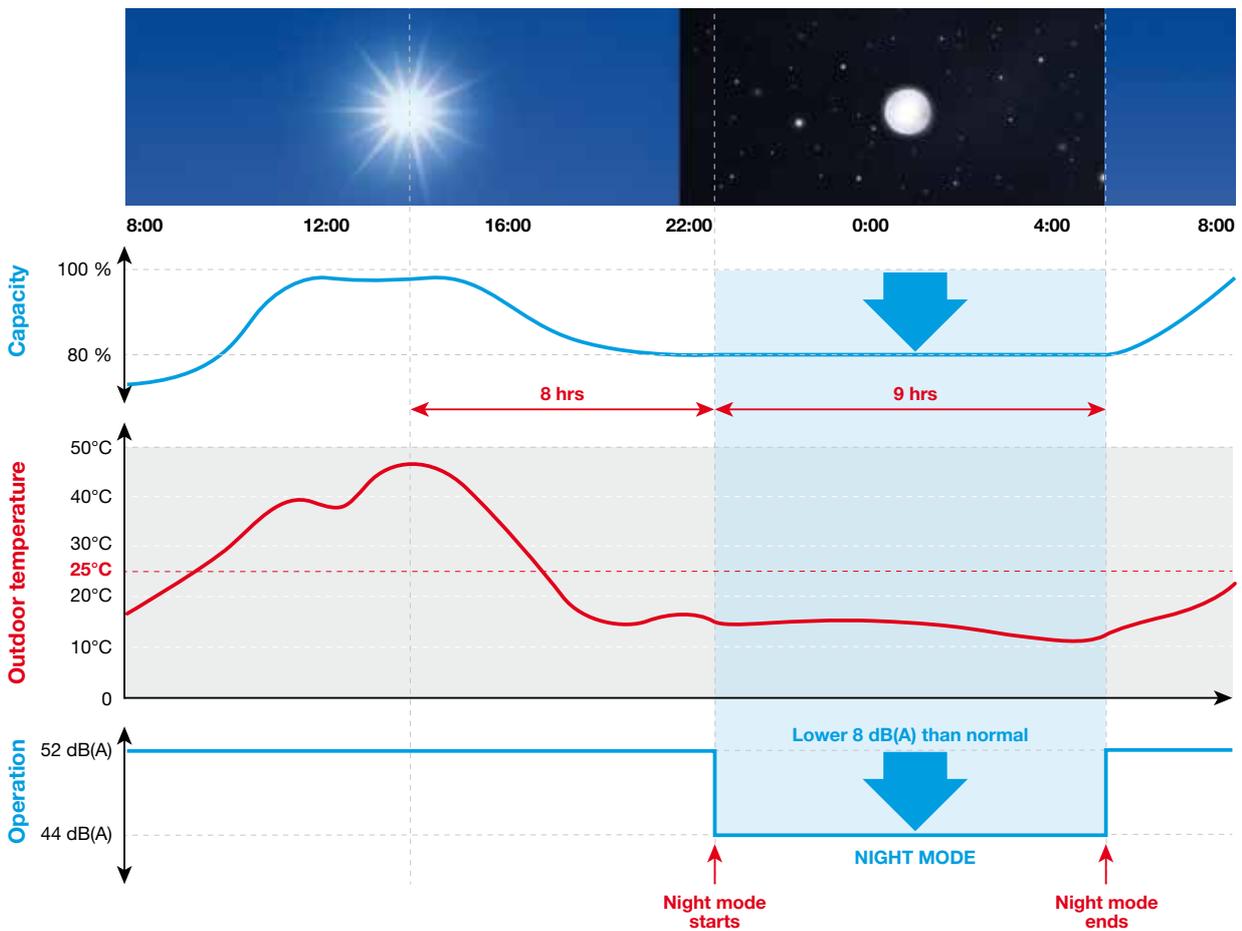

→ Additional check valve

To extend life of EEV, a check valve is used. In summer, the refrigerant only pass through the check valve to reduce approximately 50% of EEV use. In winter, EEV are used normally.

■ Regulation

- Change over via deep switch (priority heating/cooling mode)
- Low noise and at night silent running

FEATURES

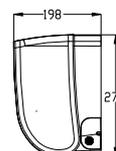

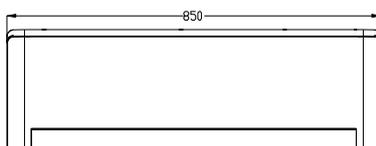

R410A FLUID

- EEV inside: for an easier installation.
- High-quality DC fan motor: Reduce the indoor unit noise greatly.
- Fashion design.
- Infrared remote controller included.

CBV

CASSETTE 600x600

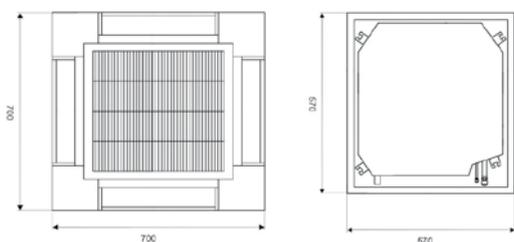

- Easy installation in false ceiling.
- Super quiet due to special fan design.
- Built-in high head pump (height up to 600 mm).
- Possible connection to a ventilation network due to a fresh air inlet (10-15% max).
- Dry contact: hotel/bungalow solutions (room card or on/off contact).

AHU Connection Kit

Airwell offers a range of connection kits to connect VRF outdoor units to third party DX air handling units.

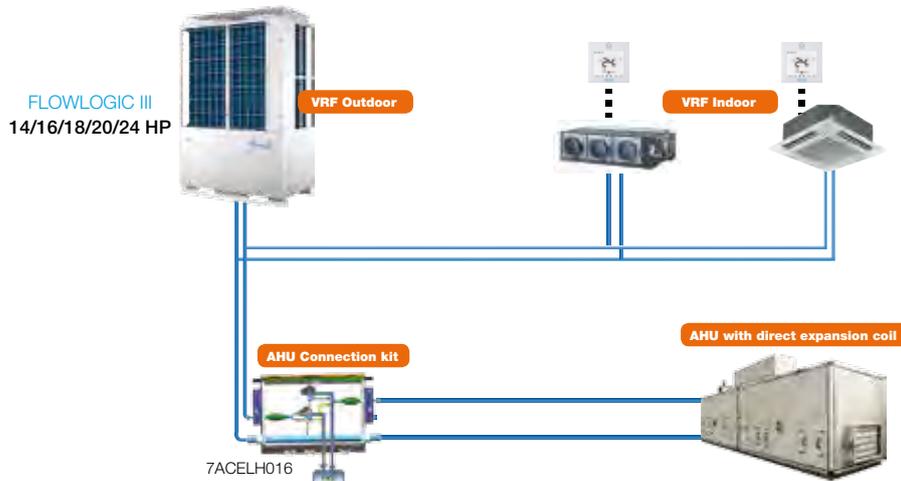

■ CONFIGURATION BETWEEN 14 AND 28 KW

5 HP (14 kW) < Connected AHU capacity ≤ 10 HP (28 kW)

AHU and direct expansion coil to be purchased through other supplier

■ CONFIGURATION BETWEEN 28 AND 56 KW

10 HP (28 kW) < Connected AHU capacity ≤ 20 HP (56 kW)

AHU and direct expansion coil to be purchased through other supplier

VRF OUTDOOR LINE UP

OUTDOOR	MINI FLOWLOGIC II	FLOWLOGIC III

Power supply	3/380~400V/50Hz 3/380~400V/60Hz	3/380~400V/50Hz/3/380~400V/60Hz 3/220V/60Hz/3/460V/60Hz
AHU kit	7ACELH015 5 HP (14 kW) < Connected AHU capacity ≤ 10 HP (28 kW)	7ACELH016 10 HP (28 kW) < Connected AHU capacity ≤ 20 HP (56 kW)

SYSTEM APPLICATION

- Provides a solution for big space to cool down the supplied fresh air with VRF outdoor units to match the air handling units. Integrates all advantages of VRF and AHU units.
- EU legislation requires that every working place has to be supplied with a minimum of 25 m³/h/person of fresh air. So it means that every office, every shop and mostly every commercial building MUST have this solution in order to comply with the standard.

Buildings

Shopping centres

Hospitals

AHU KIT CONFIGURATION

Airwell AHU Connection Kit consists in the following 4 parts:

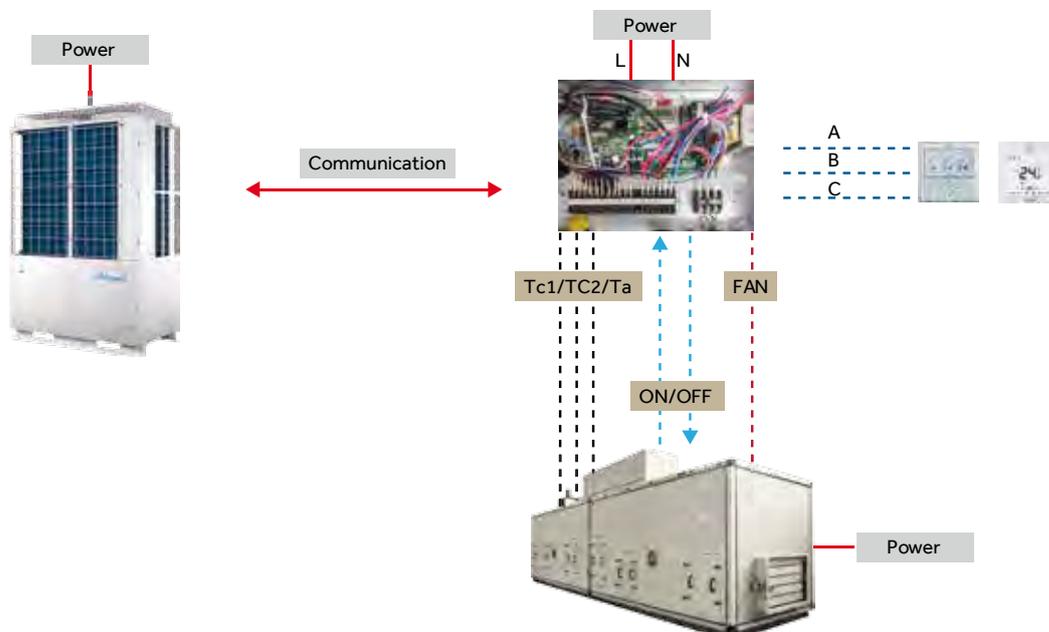

Different Valve ▼ Same Control Parts

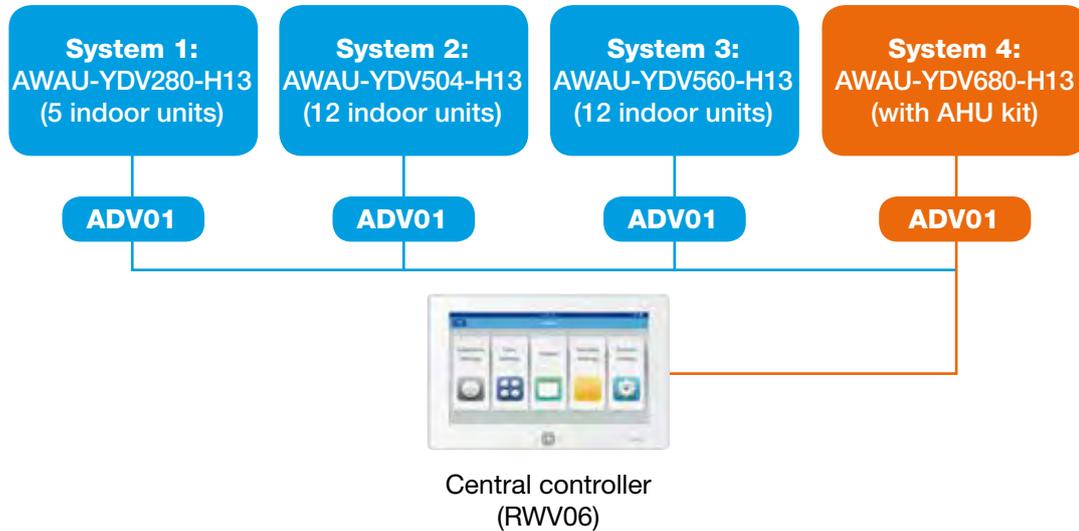

- EXV part, Control part, Sensor and wire are all integrated in one box.
- Controller need to be purchased separately.
- Temperature control via outlet air sensor on AHU.

WIRING DIAGRAM

CONNECTION KIT CONTROL

Central Control: AHU control is same as VRF indoor unit control.

Easy Installation

- AHU can provide enough cooled fresh air to big spaces other than HRV and fresh air indoor units.
- All the control system for VRF outdoor is available:
 - Wired control
 - Central control
 - Net work control
 - BMS control

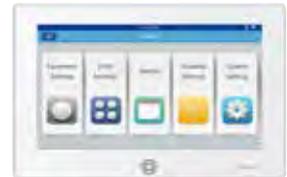

ADVANTAGES & SPECIFICATIONS

- Connected AHU capacity from 5HP to 20HP.
- Highly Compatible 1. Same PCB board with VRF indoor, easy operation and service.
- Same wired controller can be used with VRF indoor unit.

Central control solutions

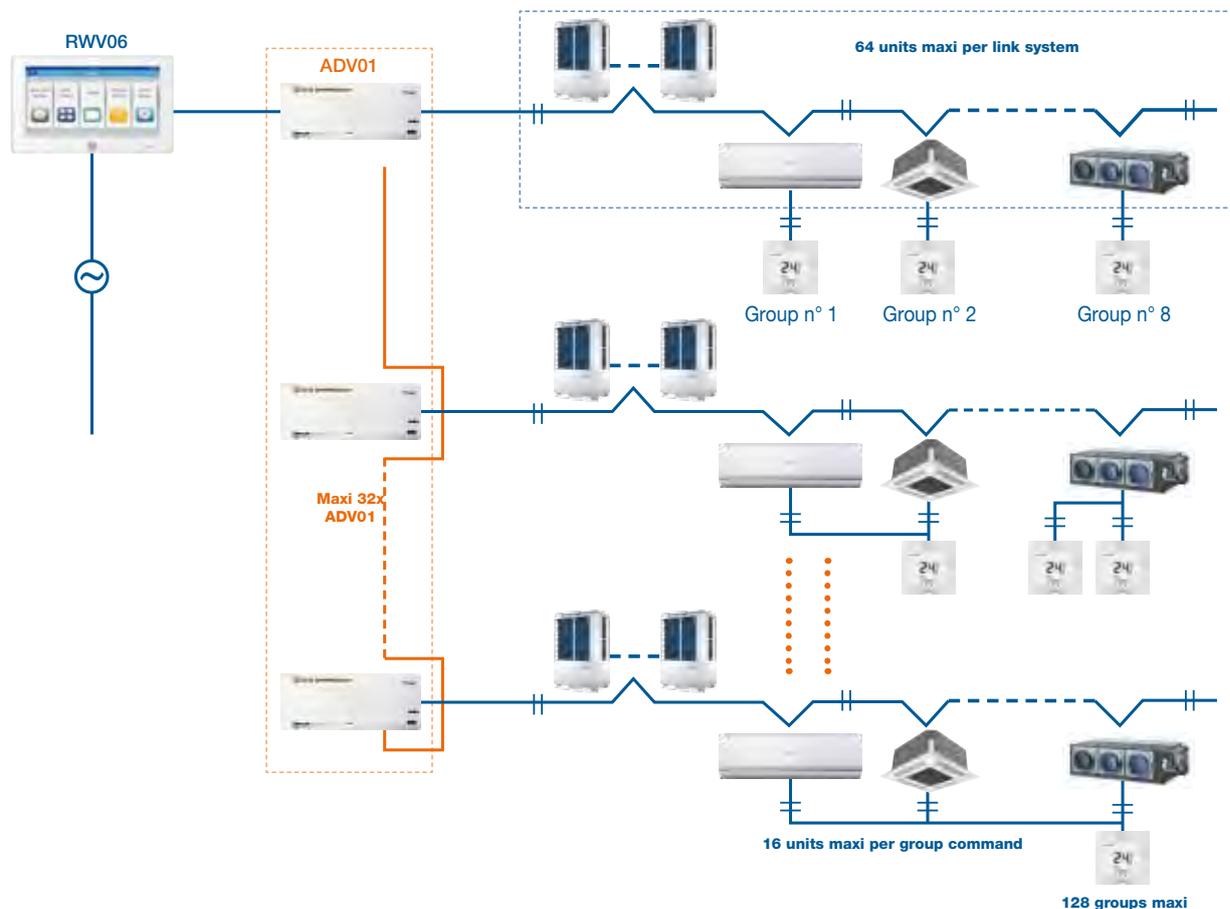

TOUCH SCREEN CENTRAL REMOTE CONTROL RWV06

Can control and monitor the indoor units conditions, with a maximum of 128 groups, each group connected to a maximum of 16 indoor units (256 indoor units max). All the controls, such as individual control, zone control, time setting, timer setting etc., can be performed on touch screen. Connecting diagram as follows:

Main functions are:

- Can monitors 128 groups (max) of indoor units (operation mode, airflow speed, temperature, setting, ON/OFF, error code display, eco mode, backup system data...).
- Program mode, airflow speed, temp., etc. for individual/zone/all.
- Checks indoor unit real temp., pipe temp. etc. parameters.
- Sets LIFO (Last enter have high priority), central control, lock, etc., 3 types of operation modes.
- Monitors the indoor units malfunctions and save the error codes for future checking.
- Weekly timer setting.
- Sets random units groups to one zone, with a maximum of 128 groups for one zone. When a zone is set, each indoor unit in this zone can have a same operation status (default setting: one group is one zone).

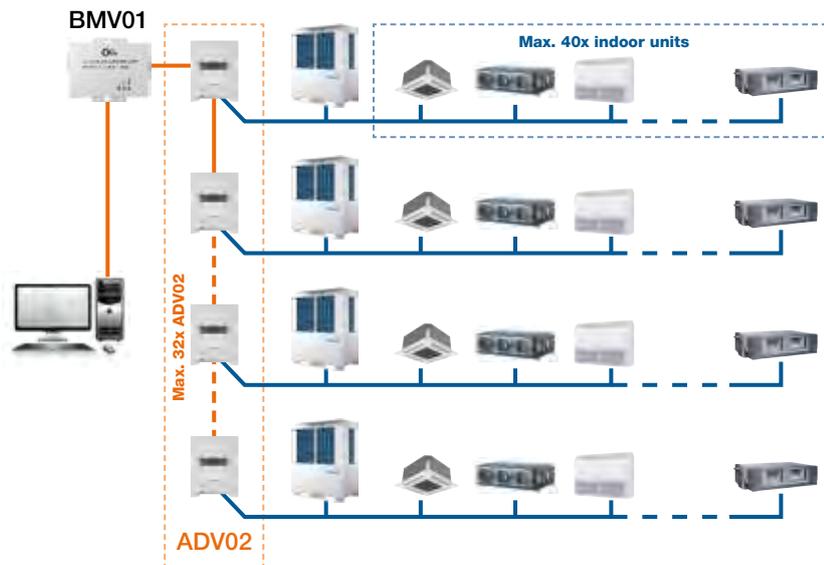

AIRWELL BMS CONTROL (BUILDING MODELLING SYSTEM)

BMS system transfers the data of air conditioner to the computer through the inverter protocol adapter (ADV02), and then the user can:

- Monitor the operation status and the power consumption of indoor and outdoor units in real time on a computer interface.
- Set the system parameters in real time.
- Start or stop each indoor unit individually or a group as per request.
- Receive the alarms and perform measurements in real time.
- Deal with the data and produces some costs and account reports.

Max. 32 ADV02 can be connected and 40 indoor units by one inverter protocol adapter (ADV02) (so a total of 1280 indoor units).

APPLICABLE FOR VRF SYSTEM

■ System combination

- Inverter protocol adapter (ADV02): Transforms the air conditioner protocol into protocol 485; receives ammeter pulse signal; accounts and saves the power cost of the connected system, then transfers it to the computer.
- Software: displays all parameters, offers a comfortable human computer interface, calculates and records power costs for accounting reports.
- RS 485&232 converter (hardware), Item 2 & 3 name is BMV01.

■ Control range

- Pay attention that the indoor quantity of every system cannot be over 40 sets or the adapter will not work normally.
- Every system needs one protocol adapter.
- One computer can control indoors within 400 sets.

APPLICABLE RANGE AND RELATIVE CERTIFICATE

■ Applicable range

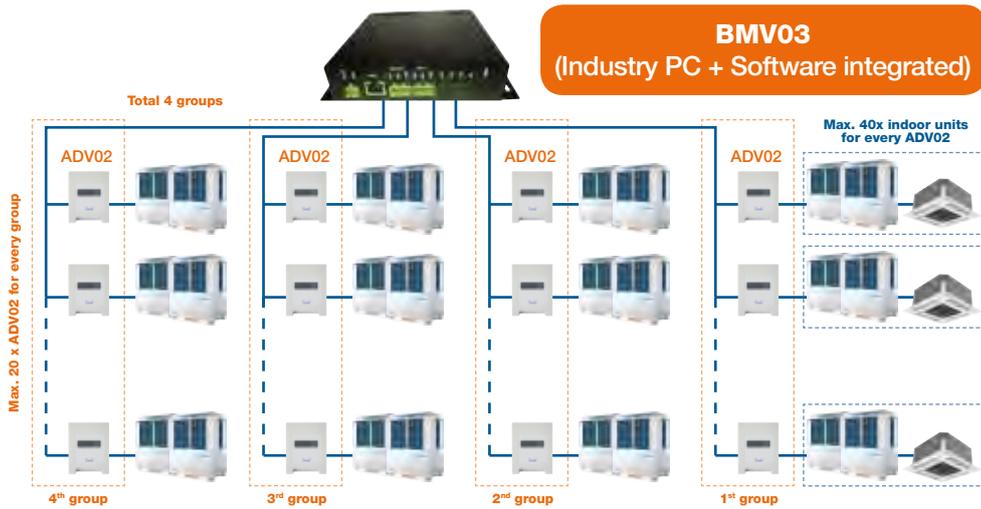

- Temp. range: -30°C~52°C
- Ambient temperature of controller: -30°C~52°C
- Ambient humidity of controller: 10%~85%
- Save temp. range of controller: -30°C~52°C
- Altitude: 0~6000m
- Voltage: 220Vac±10%
- Frequency: 50Hz

Part number ADV02: 7ACELH007
Part number BMV01: 7ACELH005

BACNET BMS CONTROL

BMV03 Network Airwell A/C management system

- Total actual connected indoor units quantity is max. 1000.
- Internet remote control.
- To be purchased through external supplier by dealer/customer:
 - computer display,
 - energy pulse meter and printer if calculations power consumption are required.
- Interface: BACnet.

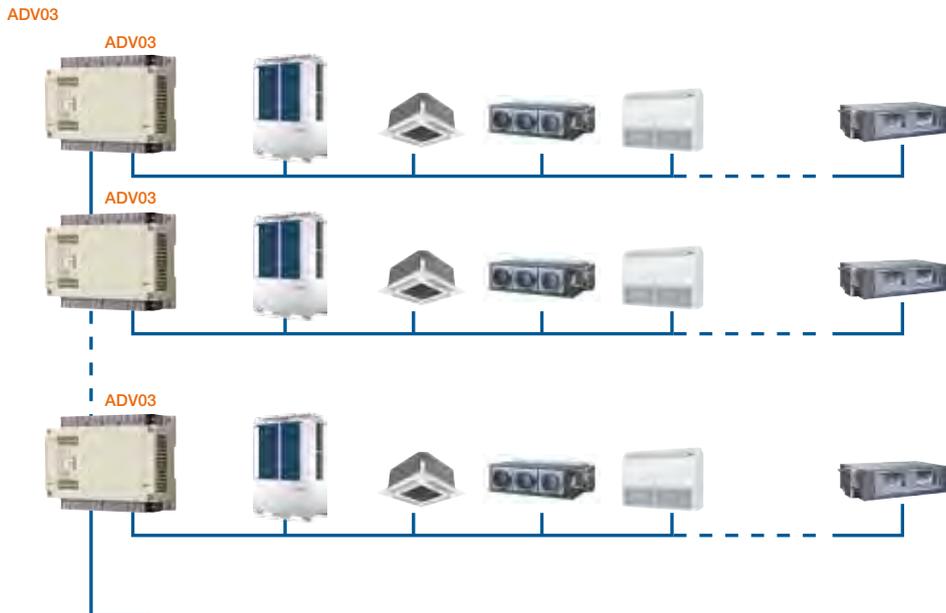

Part number BMV03: 7ACELH013
 Part number ADV02: 7ACELH007

MODBUS BMS CONTROL

- Connect ADV03 to the outdoor unit to change the homebus protocol to Modbus protocol.

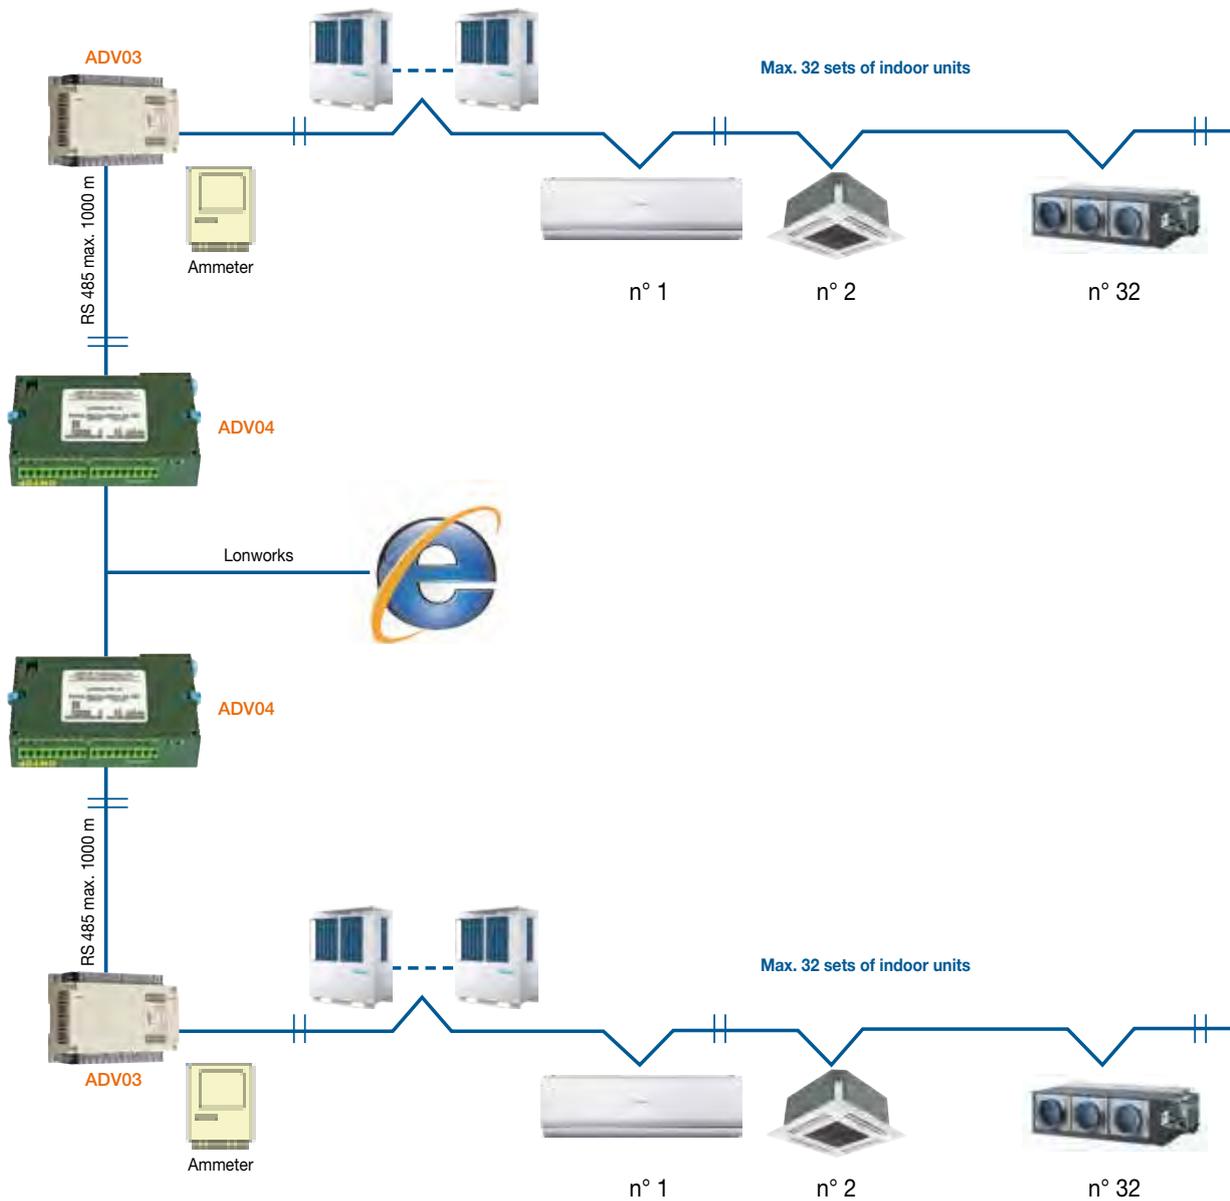

Part number ADV03: 7ACELH011

LONWORKS BMS CONTROL

- Every outdoor system adopts one ADV04 + ADV03
- In one system, total connected indoor units quantity is max. 32
- The ADV04 needs to be connected to an external 24V DC power supply

Installation accessories

[NAME]		Photo	Part number	[FUNCTION]	
COPPER	INSULATED COPPER M1		1/4"-3/8" - 10ml	7ACFH0810	Refrigerant tubing to connect outdoor unit with indoor unit (monosplit and multisplit).
			1/4"-1/2" - 10ml	7ACFH0811	
			3/8"-5/8" - 10ml	7ACFH0812	
			1/4"-3/8" - 7ml	7ACFH0813	
			1/4"-1/2" - 7ml	7ACFH0814	
			3/8"-5/8" - 7ml	7ACFH0815	
OUTDOOR UNIT SUPPORT	WALL BRACKET	Max. charge 160 kg Horiz. 560 mm Vert. 365 mm Barre 800 mm		7ACTL0506	Support to install an outdoor unit on facade (monosplit and multisplit).
	ANTI-CORROSION WALL BRACKET	Max. charge 160 kg Horiz. 460 mm Vert. 410 mm Barre 790 mm		7ACTL0507	Support to install an outdoor unit on facade (monosplit and multisplit).
	4 ANTI-VIBRATILE PADS (KIT)			7ACTL0508	Ideal to limit noise and vibrations (good neighborhood).
	FLOOR SUPPORT RUBBER RECYCLED (PAIR)	Longueur 600 mm		7ACTL0509	Necessary for a professional installation. High quality: using rubber material.
		Longueur 1000 mm		7ACTL0510	
	FLOOR SUPPORT (PAIR)	450x100 mm		7ACTL0513	Necessary for a professional installation. Good quality price ratio: using PVC material.
	RUBBER SUPPORT (PAIR+GLUE)	G600		7ACTL0511	Raise to avoid frosting. Compatible with floor support made of recycled rubber (same sizes).
		G1000		7ACTL0512	

[NAME]		Photo	Part number	[FUNCTION]	
FRAME VRF	FRAME VRF 4 FEET (2 UNITS)	Max. charge 500 kg 1000x1200 mm		7ACTL0514	Available for all VRF outdoor unit range.
	FRAME VRF 6 FEET (4 UNITS)	Max. charge 1040 kg 2000x1200 mm		7ACTL0515	Available for all VRF outdoor unit range.
	EXTENSION VRF 2 FEET	Max. charge 500 kg 1000x1200 mm		7ACTL0516	Available for all VRF outdoor unit range.
CLEANING	FLUSH KIT FOR TUBING DIVERSIFLUSH			7ACFH0816	Cleans your old refrigerant circuit (to replace old R22 installation).
	SOLVENT CONTAINER DIVERSIFLUSH (REFILL)			7ACFH0817	
WATER PUMP	WATER PUMP MINI FLOWATCH MF2			7ACTL0517	Evacuate condensates from indoor units (high wall, ducted, floor ceiling units).
	WATER PUMP FLOWATCHDESIGN			7ACTL0518	Evacuate condensates from indoor units (high wall, ducted, floor ceiling units).

Airwell Sensibo

Airwell Sensibo is a controlling system that manages remote operation of your air conditioning, whatever the brand of your air conditioner, technology (Fixed speed or Inverter) or gas used (R22, R407C, R410A...). The system is easy to install and operate.

- Works on all type of A/C which operates with infrared remote controller.
- Easy installation with no wires to the unit.
- Can be transferred from one A/C to another.
- "Plug & Play" system composed by a hub and up to 10 pods to control your air conditioning.

CONFIGURATION

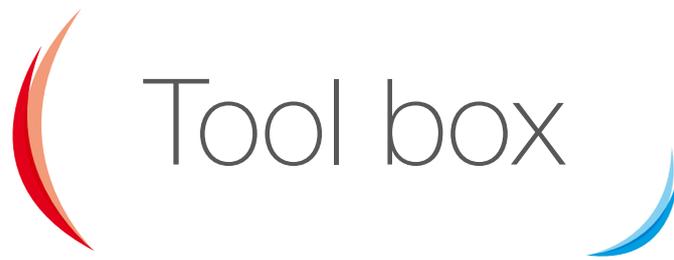

MAIN FEATURES

- | | |
|---|---|
|  <p>Cools or heats your home before you arrive</p> |  <p>Saves energy and reduces your electricity bill</p> |
|  <p>Weekly timer to save energy</p> |  <p>Lets you control the A/C from anywhere</p> |
|  <p>Optimizes temperature and humidity levels</p> | |

° Fahrenheit = °C x 9/5 + 32
 ° Celsius = (°F-32) x 5/9
 ° Celsius = T (Kelvin) - 273.15
 * Indicative values

Rated powers of our products are given for air conditions as following:
 Cooling mode: 35°C out/27°C in (dry bulb)
 Heating mode: +7°C out/20°C in (dry bulb)

SIZING THE AIR CONDITIONING

STEP 1: EVALUATING THE NEEDS

In order to size properly your air conditioning installation, it's important to calculate the thermal needs of your habitation to calculate the power needed for your setup.

■ SIZING THE COOLING NEEDS BY OCCUPANCY RATIO

We use the following ratio to calculate the cooling power needed:

$$90 \text{ W/m}^2 + 100 \text{ W/Occupant}$$

The calculation is to be done room by room.

■ SIZING THE HEATING NEEDS BY THE G METHOD

The « G » is the volume loss coefficient of the building, matching the sum of the thermal loss through walls, windows, roofs... It's expressed in $\text{W/m}^3/\text{°C}$. This coefficient is related to the building isolation.

$$\text{Heat power (W)} = G \times V \times \Delta T$$

G = global loss coefficient ($\text{W/m}^3 \times \text{°C}$):

- 0,65 W/°C m^3 new construction
- 0,75 W/°C m^3 construction after 2000
- 0,9 W/°C m^3 constructions after 1980
- 1,2 W/°C m^3 constructions moderately insulated
- 1,8 W/°C m^3 constructions poorly insulated

V = building volume (m^3)

ΔT = Temperature difference between interior (19 or 20°C), and average exterior temperature in the region where is based the project.

STEP 2: EXTERIOR UNITS SELECTION

Dispatch the cooling and heating needs calculated before (cf. step 1).

Calculate the global needs by zone, in order to determine outdoor unit capacity.

STEP 2: EXTERIOR UNIT SELECTION				
Zone	Rooms	Cooling needed (kW)	Heating needed (kW)	Maximum number of interior units desired
Zone 1	Room n°1			
	Room n°2			
	Room n°3			
	Room n°4			
	Room n°5			
	Room n°6			
	TOTAL			
Zone 2	Room n°1			
	Room n°2			
	Room n°3			
	Room n°4			
	Room n°5			
	Room n°6			
	TOTAL			
Zone 3	Room n°1			
	Room n°2			
	Room n°3			
	Room n°4			
	Room n°5			
	Room n°6

TECHNOLOGY

FLEXY MATCH

Indoor units are compatible with split or multisplit installation.

DC INVERTER

Compressor with high efficiency DC engine.

1 W STANDBY POWER

Maximum reduction of energy waste once the unit is in standby mode.

LOW VOLTAGE STARTUP

Designed to start the unit even if power is not stable.

LOW TEMPERATURE STARTUP

Unit powered on even when external temperature goes down to -15°C.

R410A FLUID

Refrigerant fluid R410A.

R32 FLUID

Refrigerant fluid R32.

VAV COMPATIBILITY

Automatic air volume Automatic control of air volume and system based on difference between real ambient temperature and temperature setting.

ELECTRONIC EXPANSION VALVE

Precise control of coolant flow, optimization of performance and compressor protection.

REFRIGERANT LEAKAGE DETECT

Indicates a refrigerant leakage on indoor unit and stops the system for compressor protection.

AIR QUALITY/CLEAN

STERIONIZER

Generates sterionizer ions producing electrochemical reaction destroying bacteria, viruses and allergenic particles. Creates and ensure provisioning of natural and high quality air in living environment.

NANO PHOTOCATALYTIC FILTER

Oxidizes and degrades organic contaminants. It can eliminate up to 99.9% of bacteria and can efficiently block dusts.

AIR FILTER

Eliminates fine particles and purifies the air.

AUTO CLEAN/DRY

Prevents development of bacteria and moistures keeping the heat exchanger dry after a cooling operation.

FRESH AIR

Cools the room bringing fresh air from outside.

FILTER CLEAN INDICATION

Control led asking for verification and cleaning of the air filter.

COMFORT FUNCTIONS

I FEEL

Precise control of temperature all around the chosen zone via a remote temperature sensor.

MOTORIZED 4D AIRFLOW

Heating and cooling operations are optimized with an automatic horizontal and vertical oscillation.

MULTIFLOW 360°

Air distribution system with great comfort on 360° and 4 directions with motorized opening control.

SLEEP MODE

Temperature in the room adjustment based on sleeping habits.

SUPER QUIET

Top design for the lowest sound level.

FUNCTION

DIGITAL DISPLAY

Digital display of error codes or temperature settings on the indoor unit.

TURBO MODE

Improved net power and fast reaction while reaching the temperature setting for the room.

PROGRAMMABLE TIMER

Adjustable timer for power on and power off.

SELF DIAGNOSTIC

Unit failure indication through a blinking led on the unit display.

LOW BATTERY INDICATION

Indicates a need for battery replacement on the remote.

AUTO RESTART (MEMORY)

Restarts automatically the unit in the last used mode when power is back.

REMOTE CONTROL LOCK

Locks the remote functions to avoid unexpected actions.

ADVANCED DEFROST

Reduces the operation to a minimum, without supplying power during defrost in heating mode.

AUXILIARY HEATER

Relaunches the heating capacity when the systems runs at a very low ambient temperature.

INTEGRATED WATER PUMP

Eliminates condensate for a simple and smooth use.

LEFT/RIGHT DRAIN CONNECTION

Easy installation connecting condensate tubing either on left or right side.

FREQUENCY CONTROL INCLUDING AIRFLOW

Adjusts the engine speed depending on the flow rate to optimize the air volume.

TWIN APPLICATION

An outdoor unit is connected to two similar indoor units.

OUTDOOR BASE HEATER

Prevents ice production.

CRANKCASE HEATER

Protects compressor oil from freezing.

CONTROL OPTION CONNECTIVITY

ALARM OUTPUT

Remote transmission of dysfunction errors.

UNIT ON OUTPUT

Displays on the remote the power on or power off status of the unit.

DRY CONTACT ON/OFF

Connection to an external presence detection with adjusted control of the unit and power saving when the room is empty.

BMS COMPATIBLE

Connection to the BMS system via PCB adapter.

SERVICE MONITOR TOOL

PC interface for monitoring and adjusting the settings of the unit.

WIFI

Air conditioner controlled via mobile phone, tablet or computer through a wireless router and internet, thanks to AIR NET application.

WIFI

Air conditioner controlled via mobile phone, tablet or computer through a wireless router and internet, thanks to AIRWELL SENSIBO application.

OUTDOOR UNIT OPTION

POWER CONSUMPTION CONTROL

Energy consumption control reducing the maximum power on the unit.

WIRED REMOTE CONTROL DIAGNOSTIC

Diagnostic mode through the remote of the indoor unit.

OUTDOOR UNIT DIGITAL DIAGNOSTIC

Displays a digital error code for an easier maintenance.

OUTDOOR UNIT NIGHT MODE DRY CONTACT

Engine speed limitation and noise level reduction of the outdoor unit.

OUTDOOR UNIT STAND-BY

Power on or power off of the outdoor unit from the remote.

OUTDOOR UNIT ALARM OUTPUT

Transmission of an air output default alarm to a remote system.

FULL LENGTH REFRIGERANT PRECHARGE

No additional fee, easy and affordable installation.

TECHNICIAN TEST MODE

Special mode optimizing the duration of intervention of the technician.

LOW AMBIENT COOLING

Operating on cooling mode even with low external temperature with advanced control system.

LOW AMBIENT HEATING

Specific conception of the unit allows operating on heating mode even with low external temperature.
